Cusp Dental Supplies Pvt. Ltd.

End-to-end ERP implementation on ERPNext v15 (Part A)

	Name	SRN	Role in the company
M1	Santosh Cheethirala	PES1UG24CS127	Sales Manager
M2	Teammate Two	PES1UG24CSXX2	Accounts & MIS Lead
M3	Teammate Three	PES1UG24CSXX3	Purchase Manager
M4	Teammate Four	PES1UG24CSXX4	Warehouse & Quality Lead

Industry domain: Healthcare (dental and medical supply distribution) · ERP: ERPNext v15 (open source, GPL-3.0) · Instance: local install, site cusp.localhost

1. Business scenario

Cusp Dental Supplies Pvt. Ltd. is a fictional Bengaluru distributor of dental consumables, implants, orthodontic supplies and small equipment. Its head office and central warehouse are in Peenya Industrial Area, and it runs a walk-in counter in Jayanagar. It supplies dental clinics across the city with same-day delivery.

Three problems shape the ERP setup:

- **Stock expires.** Anaesthetic cartridges, composites and impression material carry expiry dates, so every unit is batch-tracked and picked earliest-expiry-first.
- **Clinics order just in time.** An implant centre orders fixtures the day before surgery, so reorder levels raise purchase requests automatically.
- **Clinics pay late.** Credit limits, Net 30 terms and receivables ageing keep cash under control.

Business process cycles implemented

Cycle	Stages	Stages shown
Order-to-Cash	Quotation → Sales Order → Pick List → Delivery Note → Sales Invoice → Payment Entry	6
Procure-to-Pay	Material Request (automatic) → Request for Quotation → Supplier Quotations → Purchase Order → Quality Inspection + Purchase Receipt → Purchase Invoice → Payment Entry	7

Team and where our names and SRNs appear

Member	Role	Appears in
Santosh Cheethirala (PES1UG24CS127)	Sales Manager	User account, Employee (SRN as employee number), Sales Person, document owner, batch IDs
Teammate Two (PES1UG24CSXX2)	Accounts & MIS Lead	User account, Employee (SRN as employee number), Sales Person, document owner, batch IDs
Teammate Three (PES1UG24CSXX3)	Purchase Manager	User account, Employee (SRN as employee number), Sales Person, document owner, batch IDs
Teammate Four (PES1UG24CSXX4)	Warehouse & Quality Lead	User account, Employee (SRN as employee number), Sales Person, document owner, batch IDs

Master data: user accounts, employee records, sales persons. Transaction data: every document records its creator; sales orders carry the sales person; purchase orders carry the Buyer; every batch ID contains the SRN of the member who counted or received the stock.

2. The EBS product: ERPNext

ERPNext is an open-source ERP built on the Frappe Framework (Python, JavaScript, MariaDB) and released under GPL-3.0. It covers accounting, procurement, sales, CRM, stock, manufacturing, projects, assets, point of sale, quality, support and HR/payroll (through the Frappe HR app), with a no-code builder for forms, reports, workflows and dashboards.

Attribute	Detail
Company	Frappe Technologies Pvt. Ltd.
Headquarters	C/205, Neelkanth Business Park, Vidyavihar West, Mumbai, Maharashtra 400086, India
Company locations	Head office in Mumbai; sales phone lines for the United States and the United Kingdom; delivered worldwide through 200+ partners
Founder / original author	Rushabh Mehta
Origin	Company founded 2008; ERPNext v1.0 first published as open source in June 2010
Versions	v4 (2014) introduced the Frappe app architecture; v13, v14, v15 (installed here: 15.124.5 on Frappe 15.126.0); v16 stable from January 2026
Licence and stack	GPL-3.0; Python, JavaScript, Vue.js; MariaDB/PostgreSQL; Redis; Node.js
Adoption	30,000+ companies (vendor figure)
Clients (public case studies)	Teabox, Precihole Machines, Sree Mahalakshmi Agencies, Touchmagix Media
Funding	Rs 10 crore from Zerodha's Rainmatter (announced November 2020)

Features used in this project

- Selling: quotations, sales orders, pick lists, delivery notes, sales invoices, credit-limit control, sales teams
- Buying: material requests, automatic reorder, RFQs, supplier quotations and comparison, purchase orders
- Stock: batches with expiry, FEFO picking, quality inspection, stock reconciliation, multiple warehouses
- Accounts: GST tax templates, payment terms, payment entries, receivables ageing, gross profit
- No-code tools: Customize Form (custom Buyer field), Report Builder, Number Cards, Dashboard Charts, Dashboards

All facts are taken from the sources listed in Section 5.

3. Installation and setup

Step	Action
1	Enable WSL2 Ubuntu 24.04 on Windows 11
2	Install MariaDB 10.11, Redis, Node 20 + yarn, wkhtmltopdf and Python build tools (apt)
3	Configure MariaDB for utf8mb4, set the root password
4	Install Frappe Bench (pipx) and run bench init --frappe-branch version-15
5	bench get-app --branch version-15 erpnext
6	bench new-site cusp.localhost, then bench --site cusp.localhost install-app erpnext
7	bench start, open http://localhost:8000 and complete the setup wizard (India, INR, FY Apr–Mar)
8	Configure: Stock Settings (FEFO, auto reorder), Buying Settings (PO and receipt required), Accounts Settings (credit controller), GST templates, Net 30 terms

Data loaded

Master entity	Records	Notes
Customer	12	Fictional Bengaluru dental clinics, 6 groups, 5 territories, credit limits
Supplier	8	Dental manufacturers + 1 wholesaler, Net 30
Item	24	24 dental products in 8 item groups, batch + expiry where real
Warehouse	7	Peenya Central, Jayanagar Counter, Quarantine & Expired + defaults
Employee	6	4 team members (SRN = employee number) + 2 staff
Price List / Item Price	3 / 72	Standard Buying, Standard Selling, Chain Tier Selling
Batch (supporting)	40	Batch IDs embed the SRN of the member who counted/received the stock

Transaction document	Submitted
Sales Order	12
Purchase Order	12
Quotation	4
Delivery Note	11
Sales Invoice	11
Purchase Receipt	12
Purchase Invoice	12
Payment Entry	17

Opening stock was entered with a Stock Reconciliation dated 31 Jul 2026 and opening capital with an opening journal entry. All transactions are dated August to November 2026, entered in date order.

4. Figures

The following pages show one screenshot per page, in this order: installation and setup (Figures 1–2), master data (3–12), transaction tables (13–14), the order-to-cash cycle (15–21), the procure-to-pay cycle (22–29), reports (30–36), the executive dashboard (37–38) and the relational schema (39–40).

Figure 1. Installation: bench, Frappe and ERPNext running in WSL Ubuntu

ERPNext v15 was installed with the Frappe Bench tool on Ubuntu 24.04 (WSL2) with MariaDB 10.11, Redis, Node 20 and Python 3.12. The output confirms the installed app versions and the site **cusp.localhost**, served at http://localhost:8000.

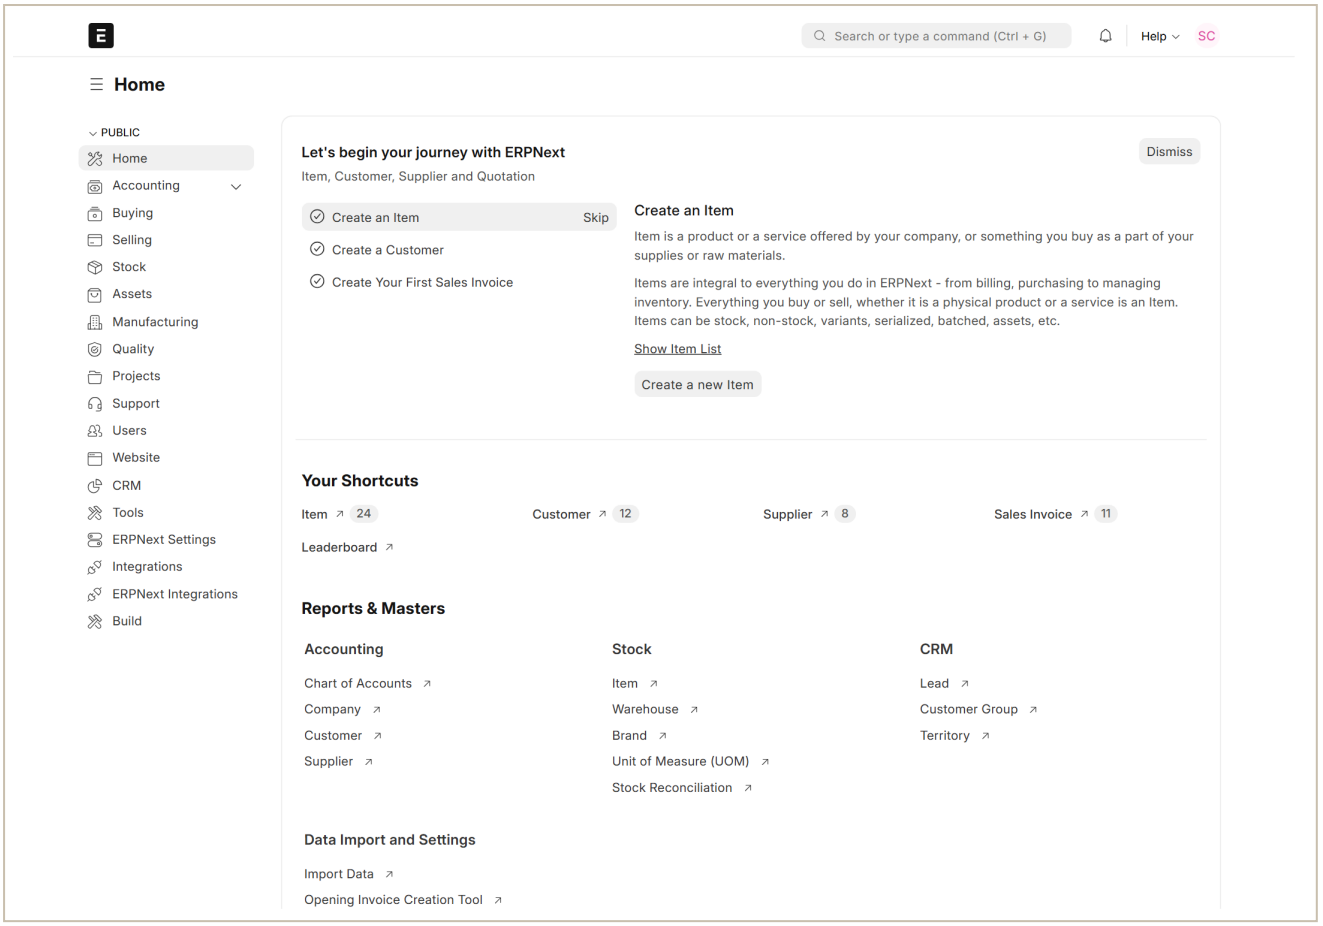

Figure 2. ERPNext desk after login

The ERPNext home workspace, logged in as Santosh Cheethirala (PES1UG24CS127). Each team member has their own user account, so every document in this report shows the member who created it.

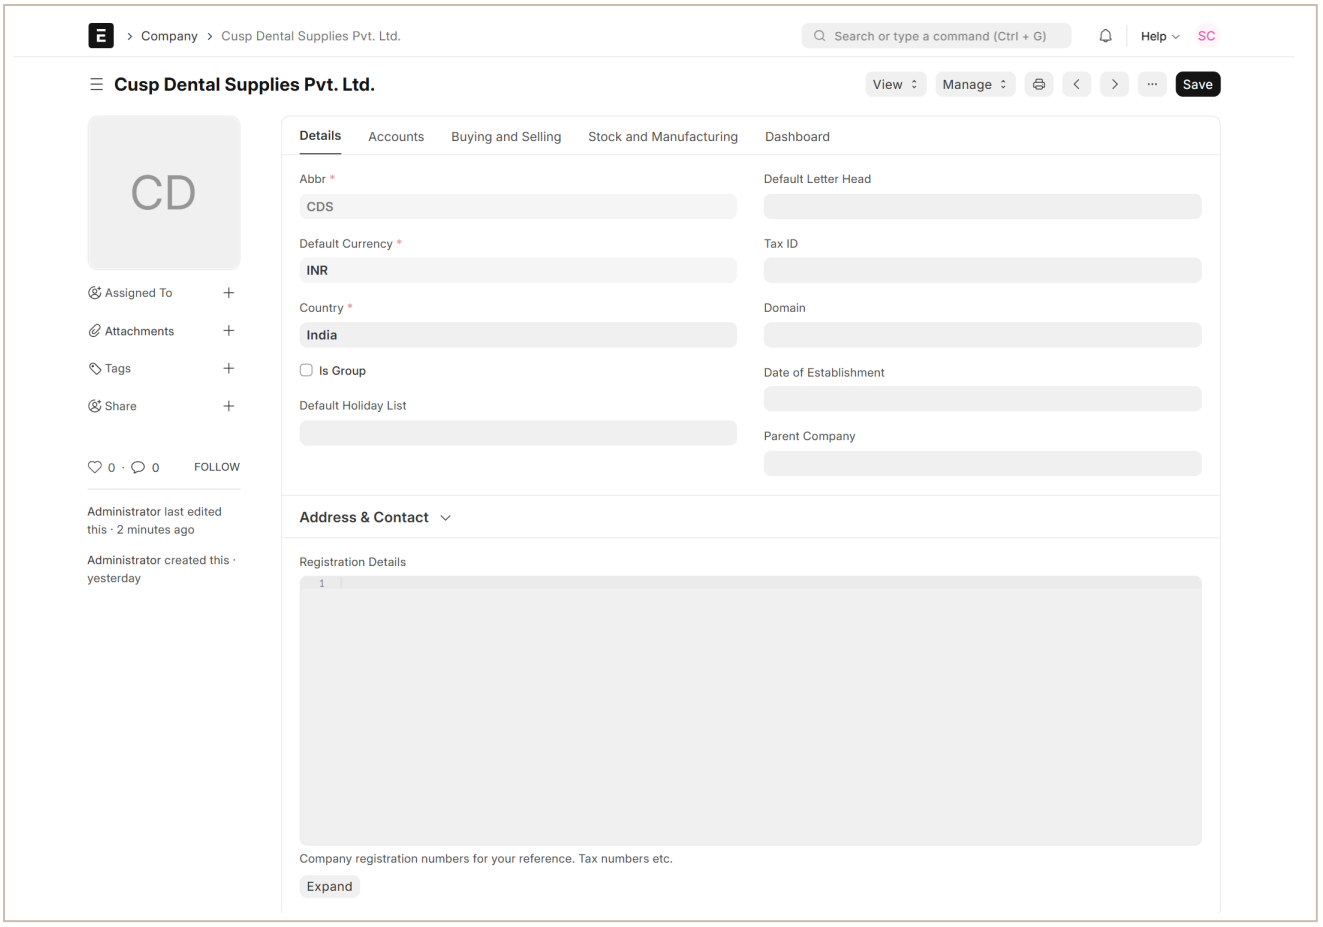

Figure 3. Company master: Cusp Dental Supplies Pvt. Ltd.

The company was created with the setup wizard: country India, currency INR, fiscal year April 2026 to March 2027, abbreviation **CDS** and the standard Indian chart of accounts. Default warehouse, bank account and tax templates are attached to it.

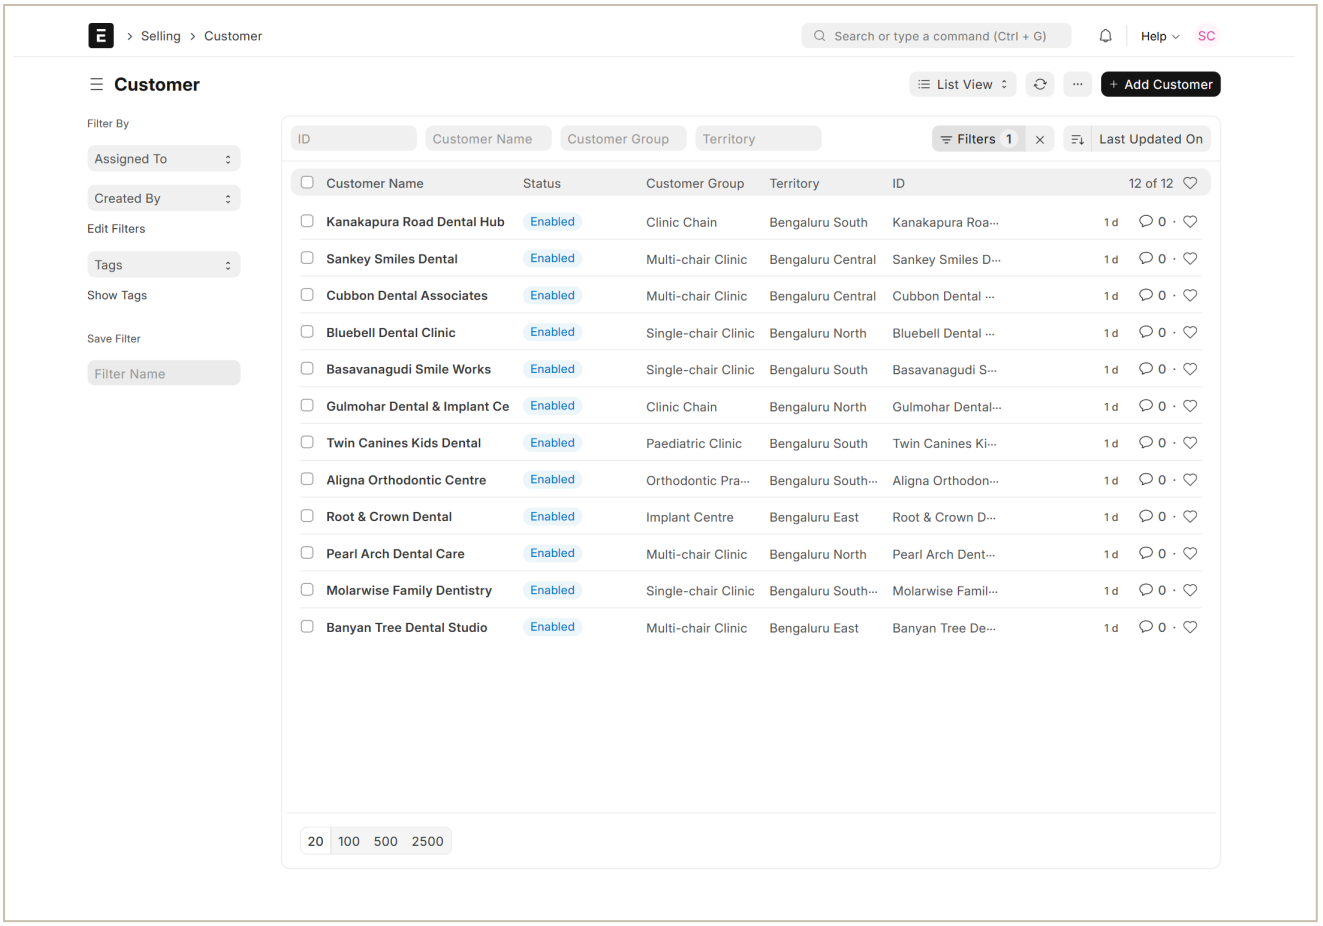

Figure 4. Master 1: Customers (12 Bengaluru dental clinics)

All 12 customers are fictional clinics across five Bengaluru territories, grouped by clinic type (single-chair, multi-chair, implant centre, orthodontic, paediatric, clinic chain). Each has a credit limit, Net 30 payment terms, a contact doctor and a billing address.

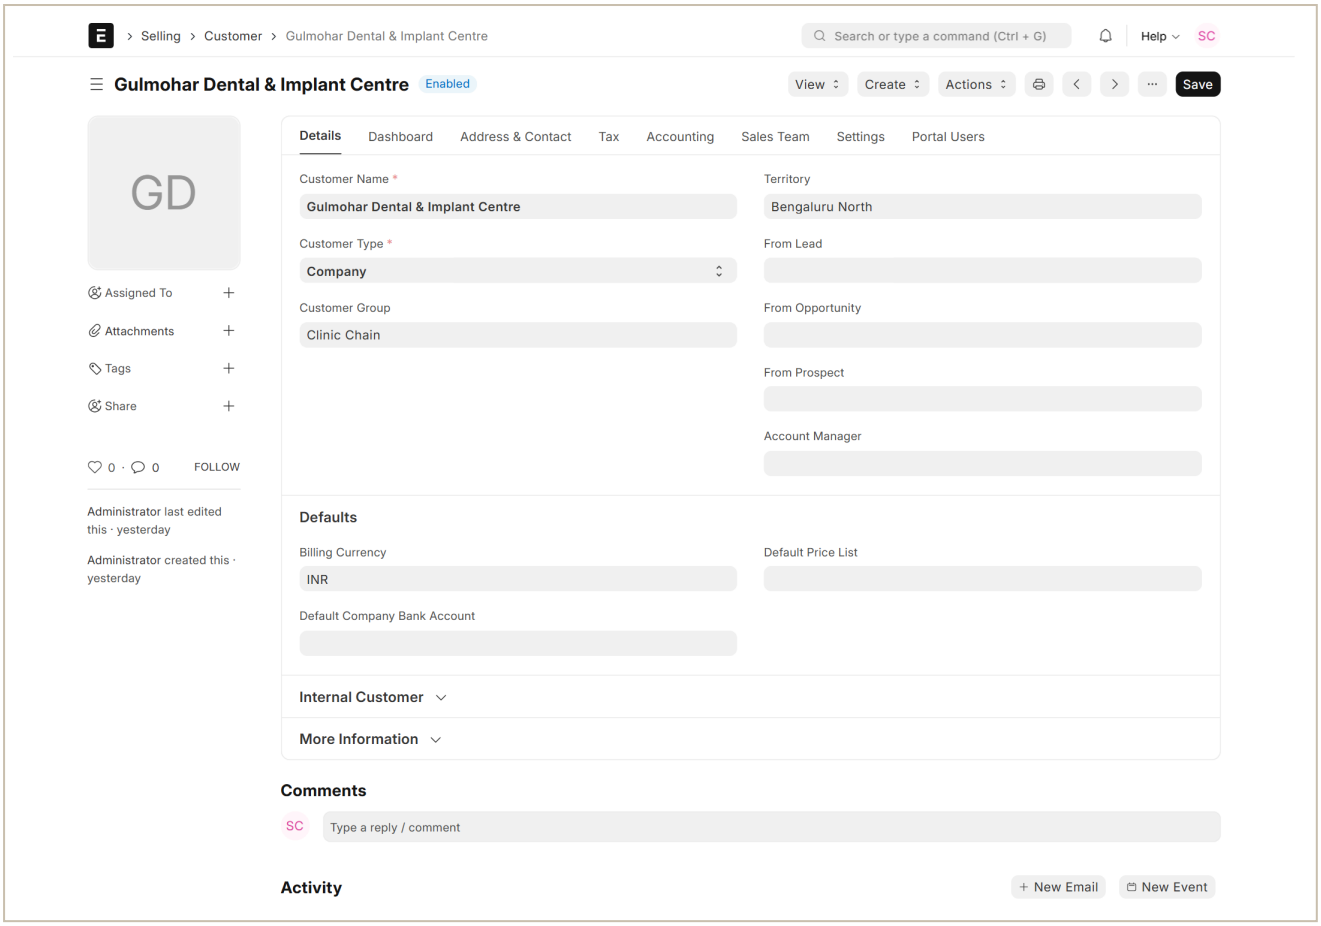

Figure 5. Customer form: Gulmohar Dental & Implant Centre

A clinic chain customer. Its customer group carries the **Chain Tier Selling** price list, so chain orders are priced about 8% below standard automatically. The sales team row links the clinic to the sales person who covers its territory.

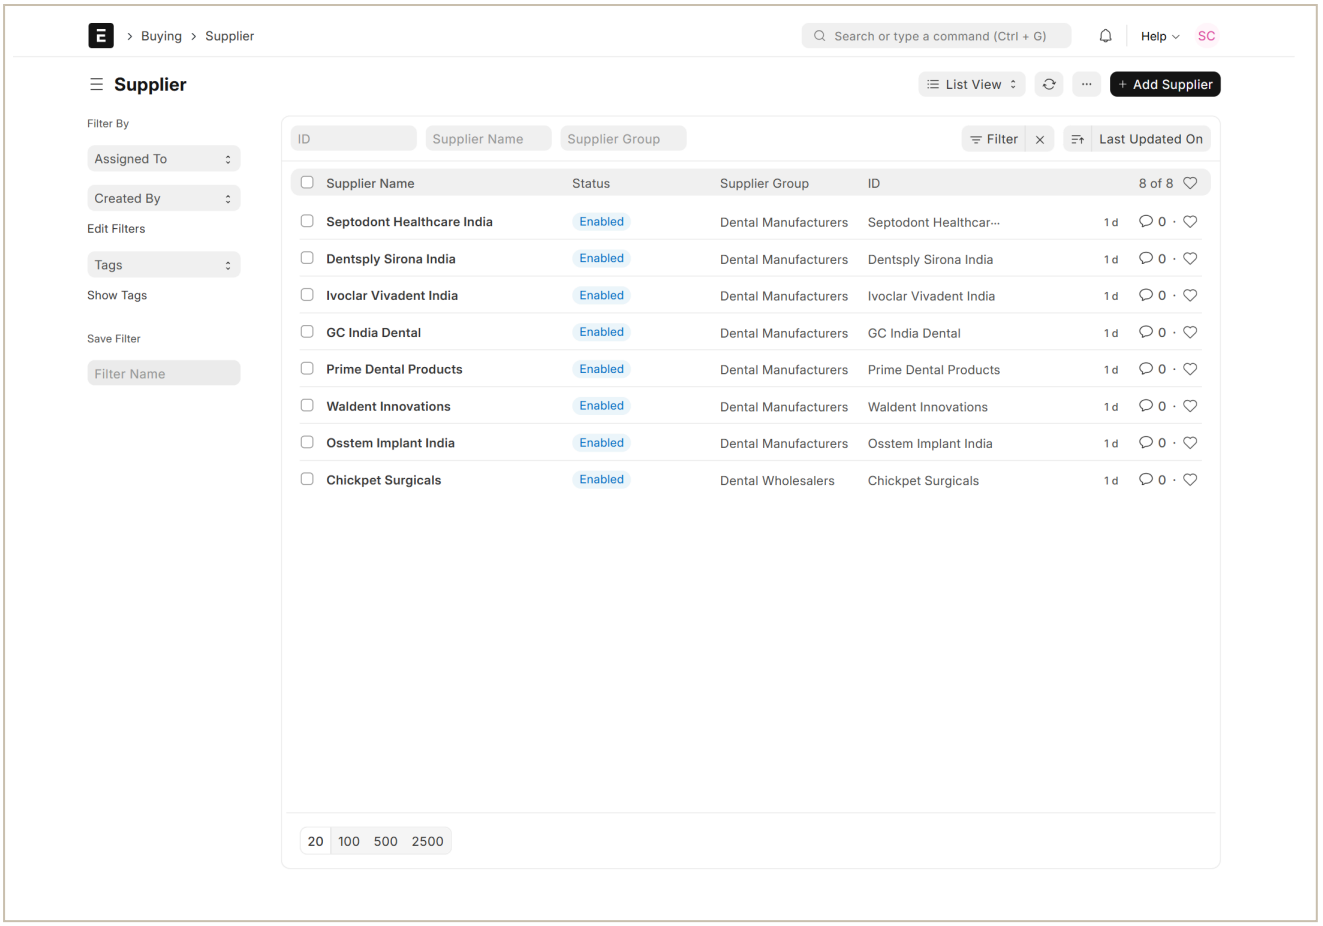

Figure 6. Master 2: Suppliers (8)

Seven dental manufacturers and one local wholesaler (Chickpet Surgicals, fictional), in two supplier groups. Each supplier has Net 30 terms, a contact and a Bengaluru supply-branch address.

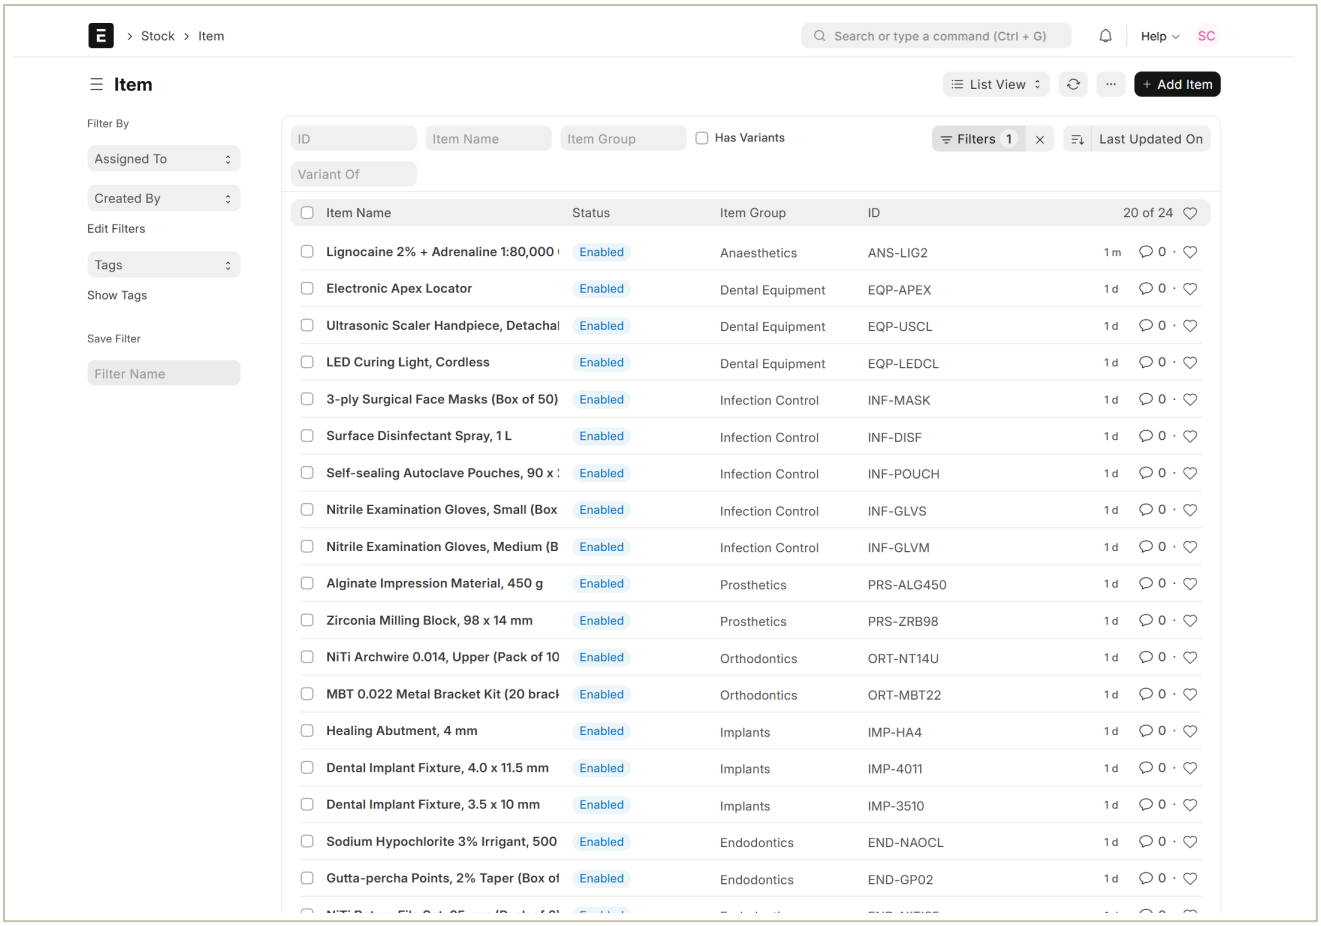

Figure 7. Master 3: Items (24 dental products in 8 item groups)

Anaesthetics, restoratives, endodontics, implants, orthodontics, prosthetics, infection control and equipment. Item codes are meaningful (e.g. ANS-LIG2, IMP-3510), and each item has a GST item tax template (5% or 18%).

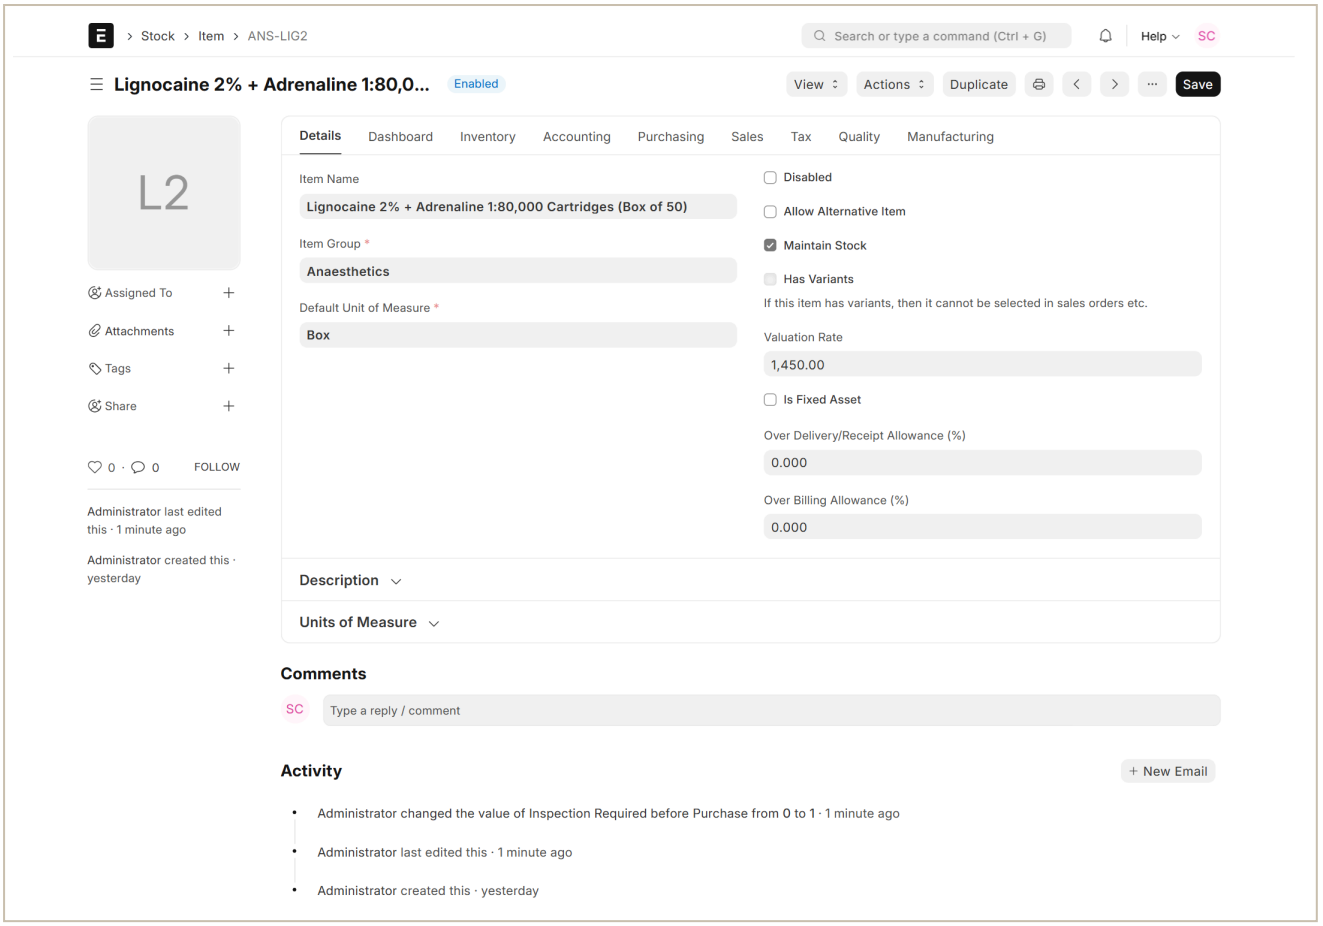

Figure 8. Item form: ANS-LIG2, lignocaine 2% cartridges

Lignocaine is batch-tracked with expiry dates, because anaesthetic stock expires. The item also requires a quality inspection before purchase, which is used in the procure-to-pay cycle.

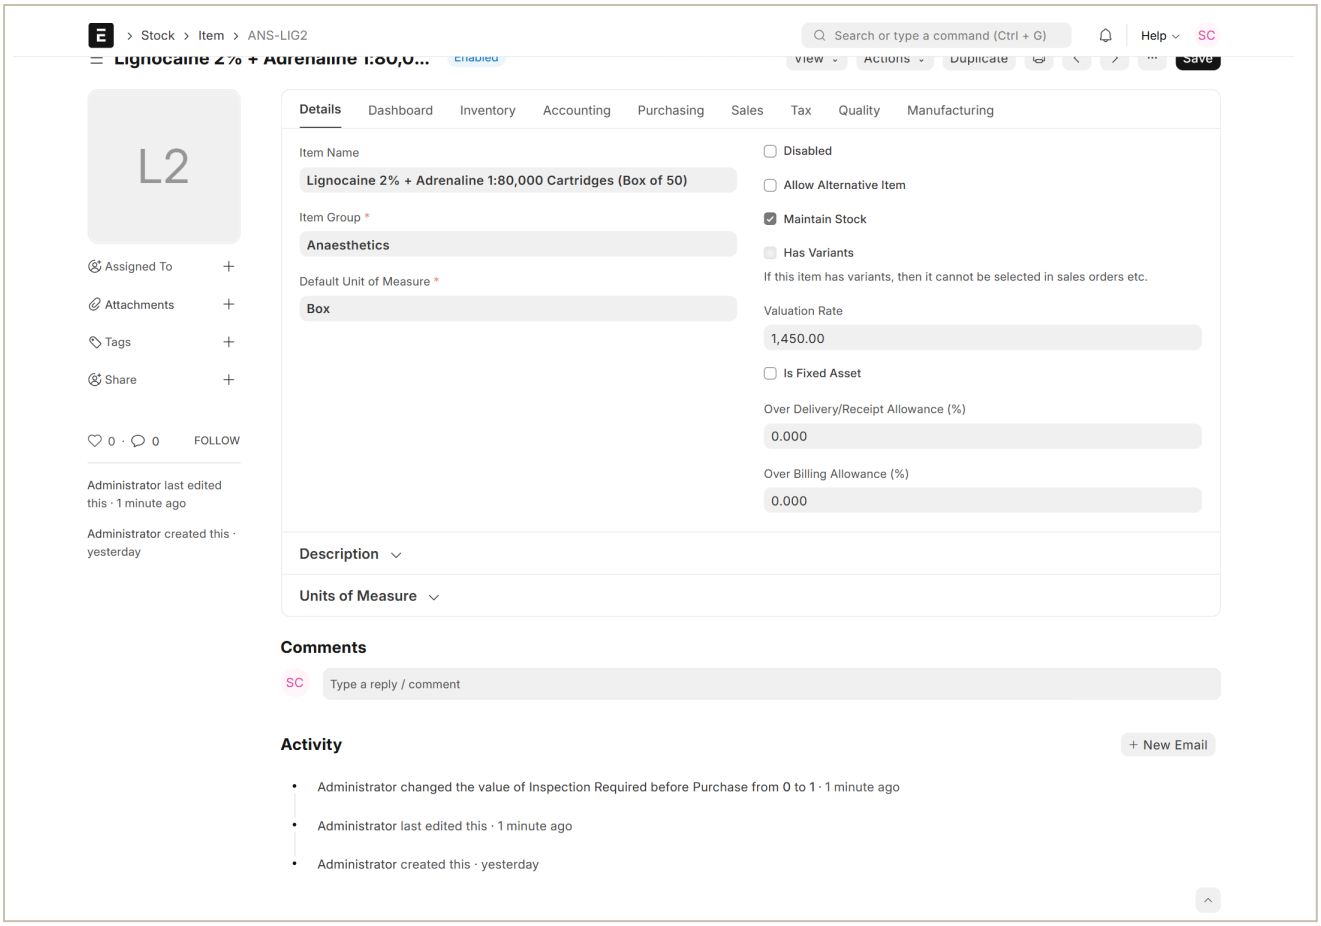

Figure 9. Item ANS-LIG2: reorder level and batch settings

The reorder level (25 boxes) and reorder quantity (50 boxes) for Peenya Central drive ERPNext's automatic Material Request in cycle 2.

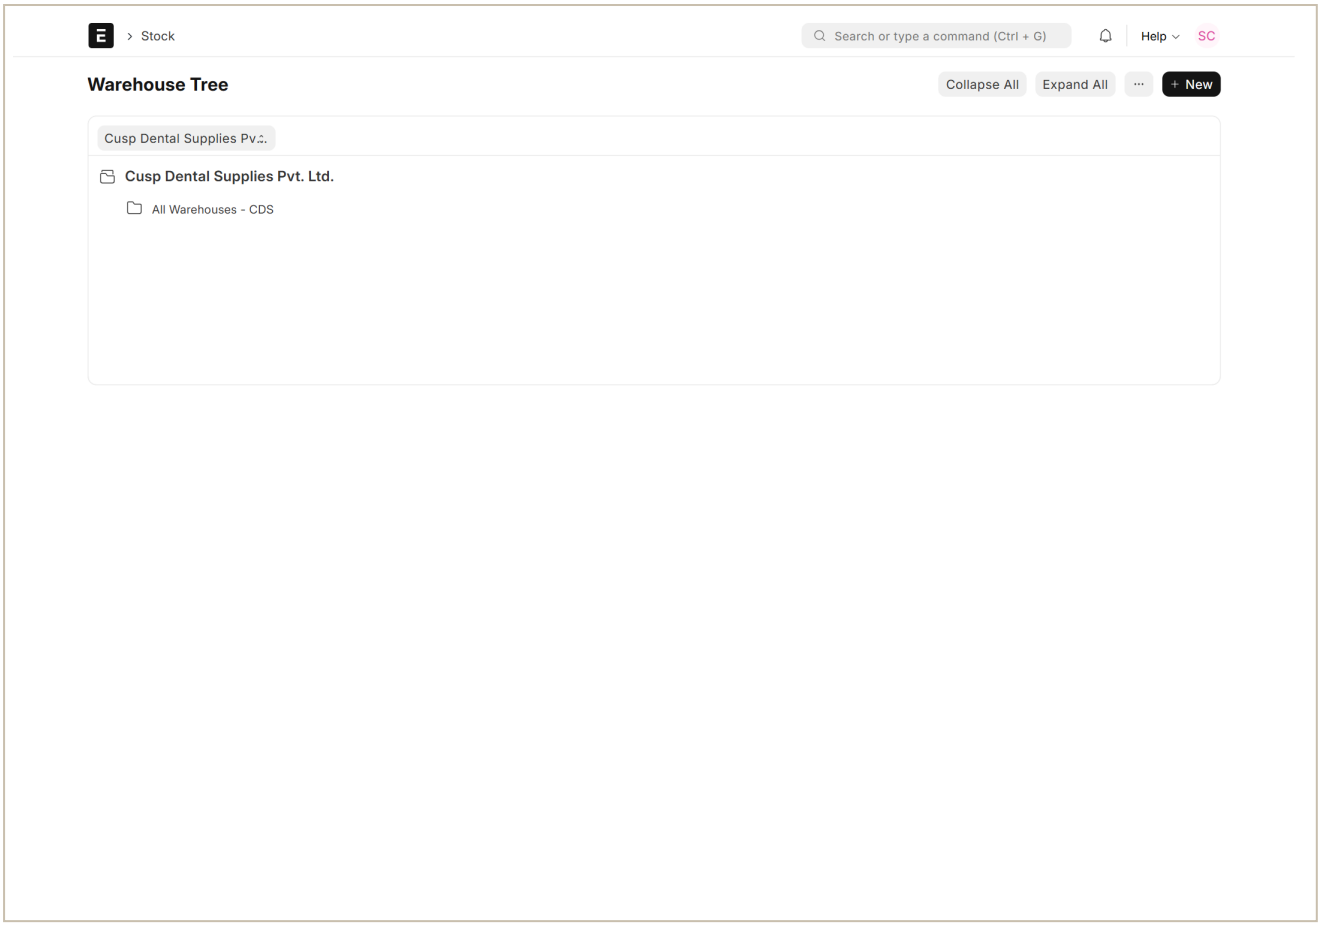

Figure 10. Master 4: Warehouses

Peenya Central (main store), Jayanagar Counter (walk-in sales), Quarantine & Expired, and the default Stores, Work In Progress, Finished Goods and Goods In Transit warehouses created by the setup wizard.

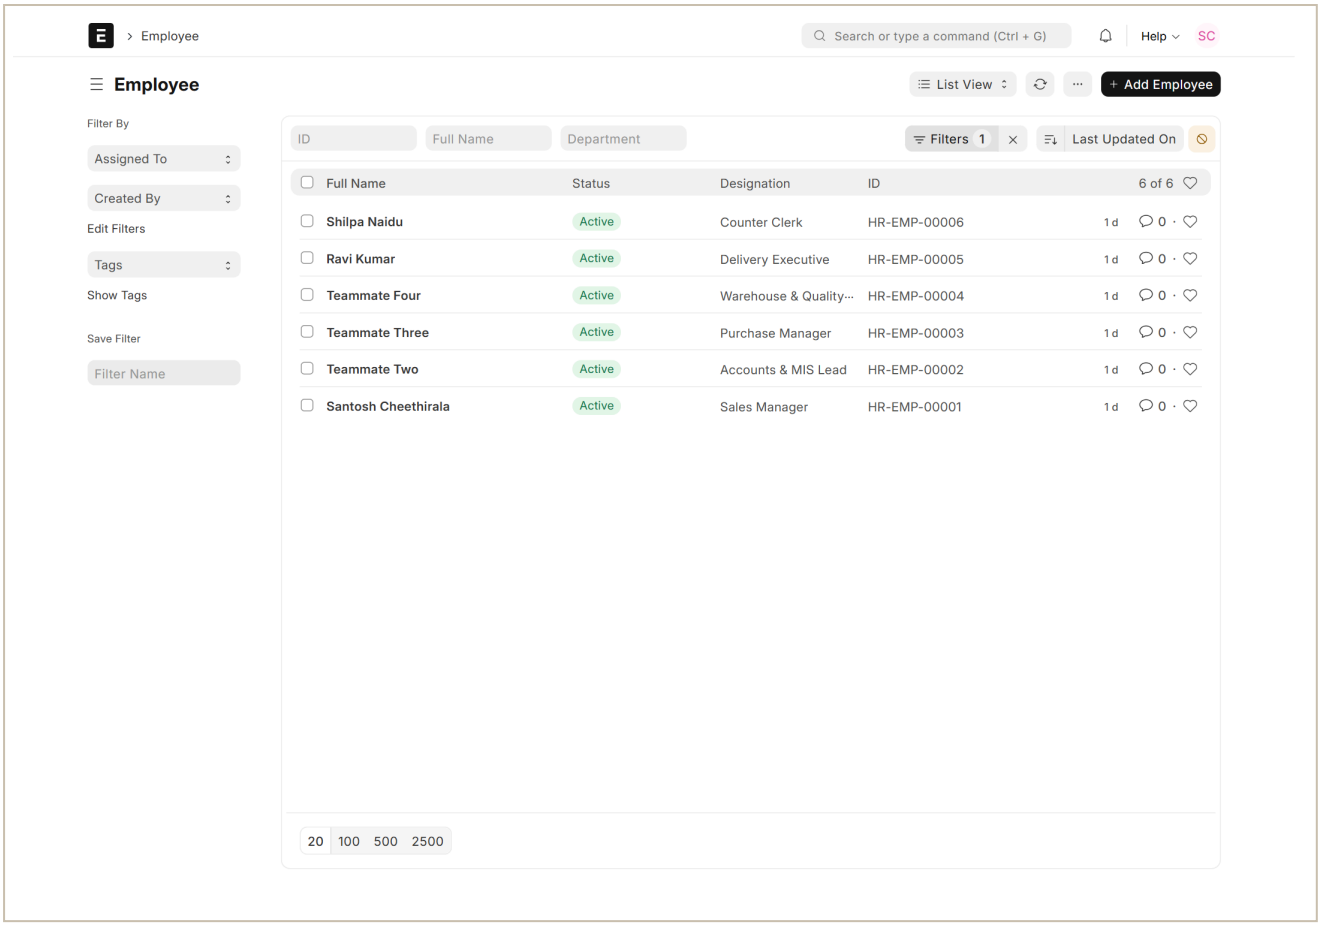

Figure 11. Master 5: Employees (team members with SRNs)

The four team members are employees, with their SRN as the employee number and a real role: Sales Manager, Accounts & MIS Lead, Purchase Manager, and Warehouse & Quality Lead. Two fictional staff complete the team.

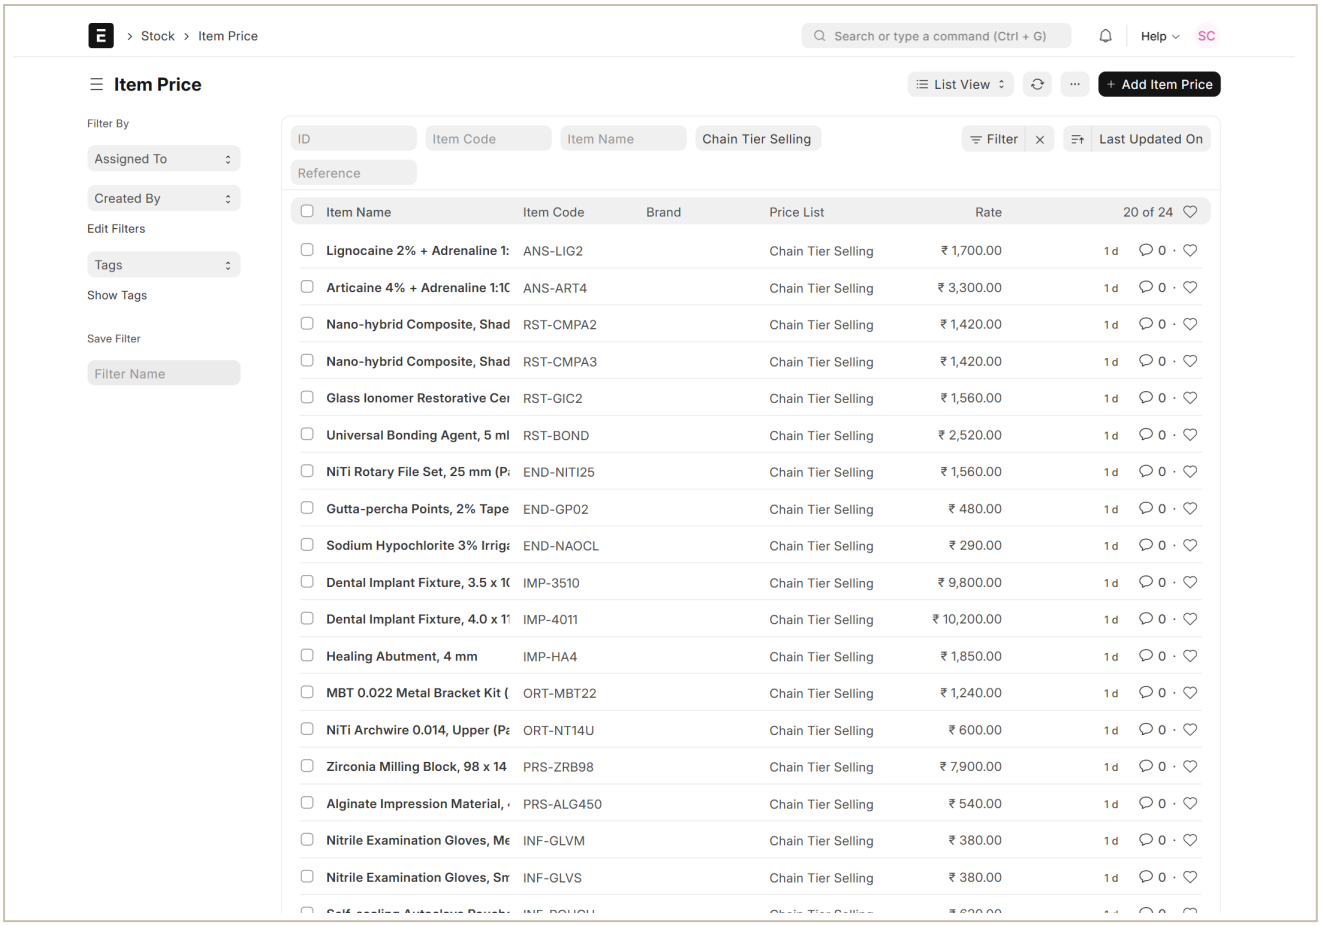

Figure 12. Master 6: Price lists and item prices

Three price lists (Standard Buying, Standard Selling, Chain Tier Selling) with 72 item prices. The same item has a different price by customer tier.

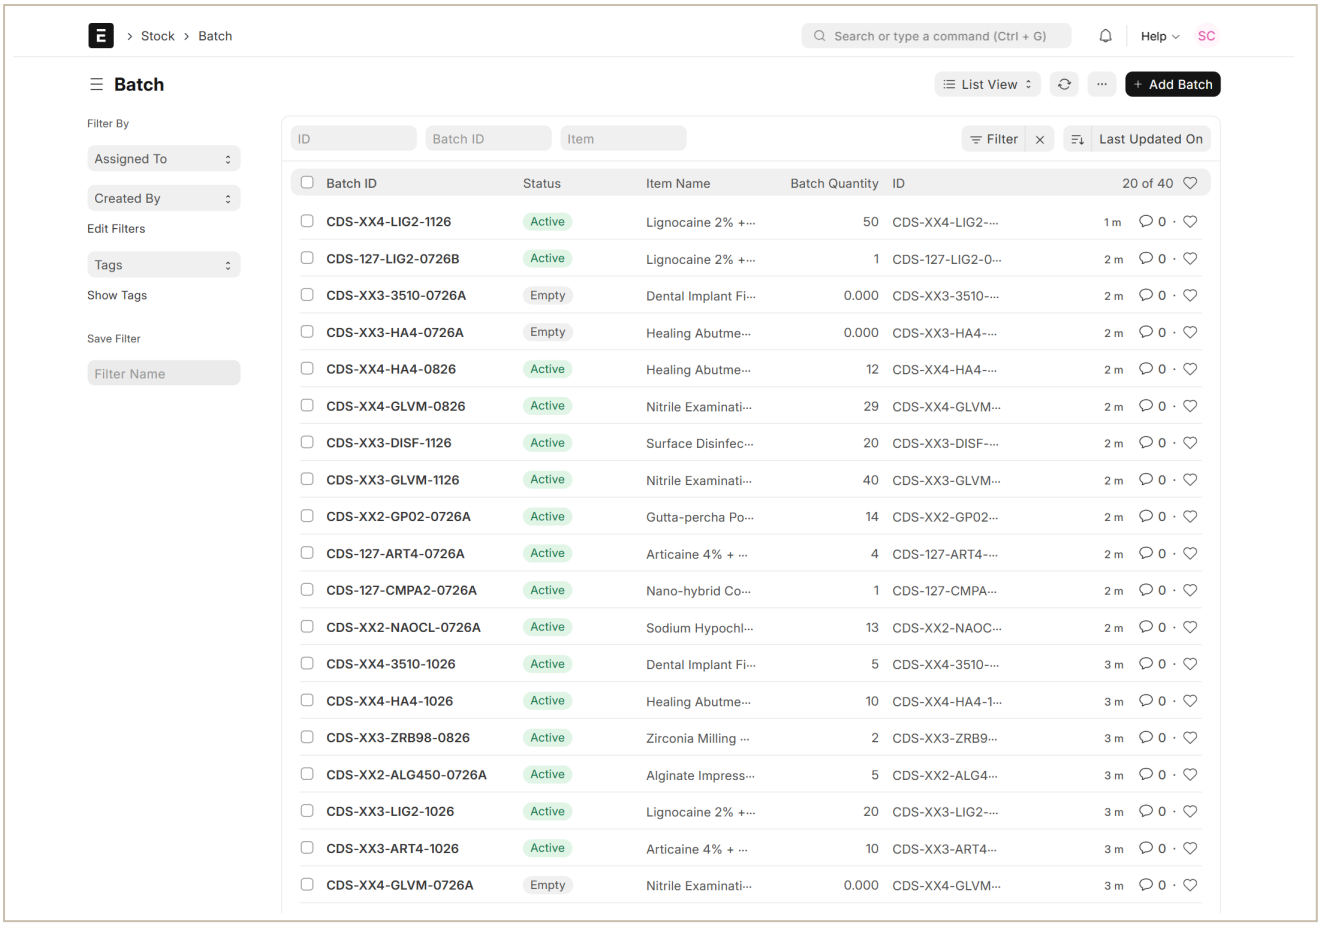

Figure 13. Supporting master: Batches with expiry dates

Every batch ID embeds the SRN of the team member who counted or received the stock (CDS-<SRN>-<item>-<MMYY>), so SRNs appear in every stock transaction.

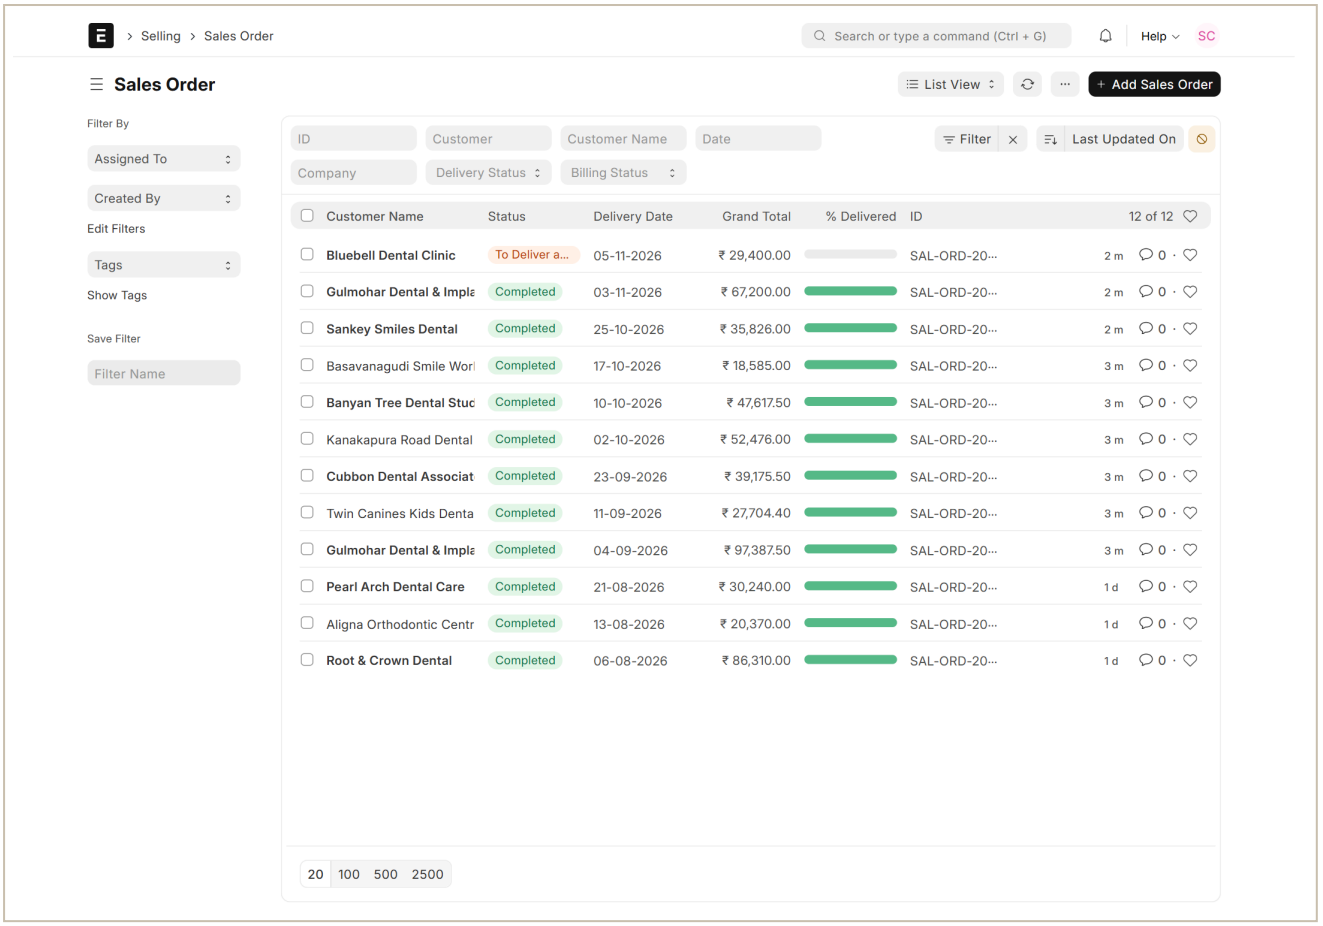

Figure 14. Transaction table 1: Sales Orders (12)

Twelve sales orders from August to November 2026, each by the sales person of the clinic's territory. Statuses show the full spread: completed, to bill, to deliver, and one order still awaiting delivery.

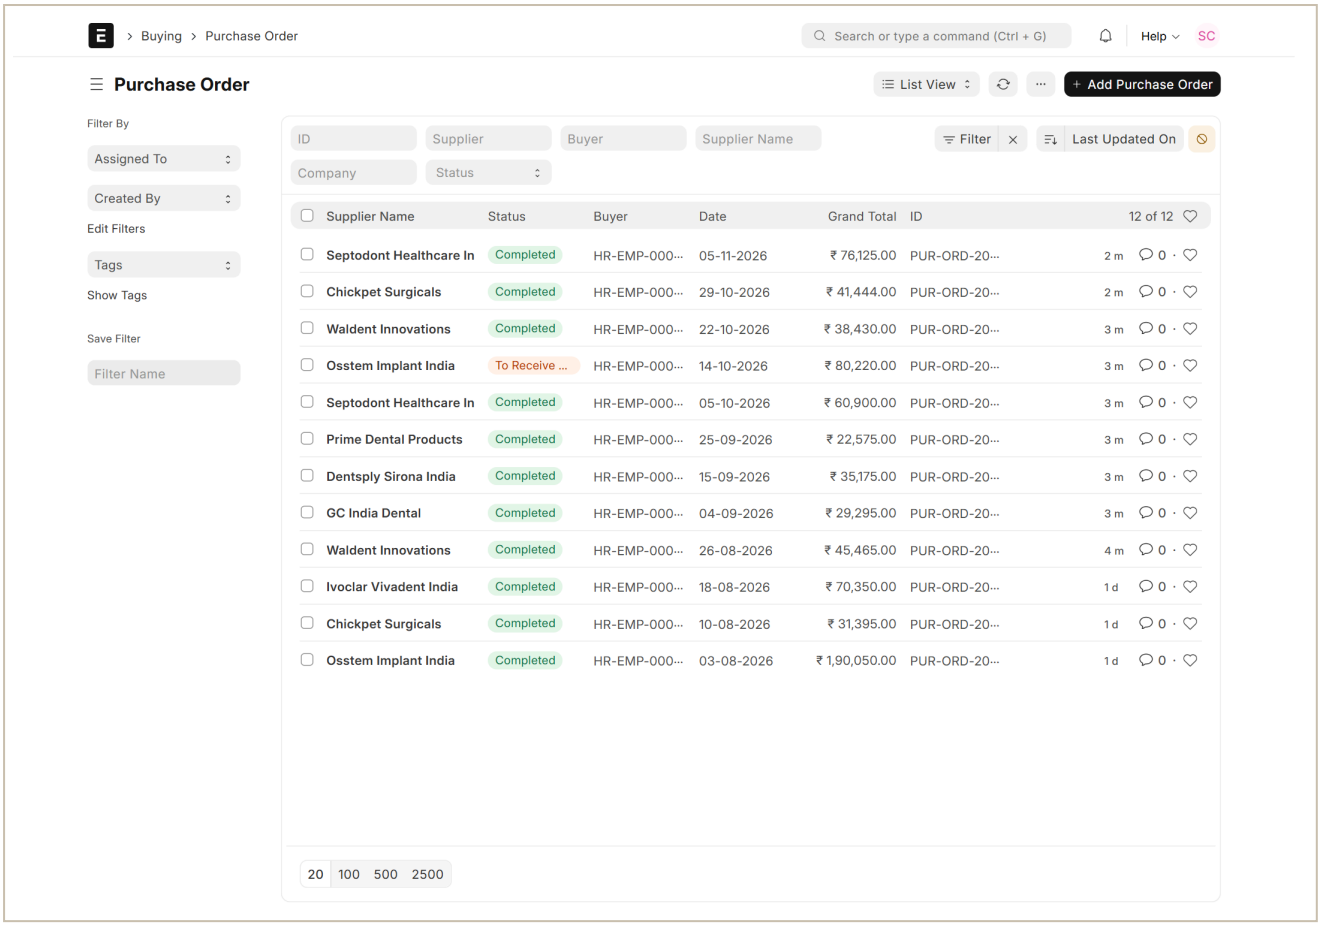

Figure 15. Transaction table 2: Purchase Orders (12)

Twelve purchase orders to the eight suppliers, each with a Buyer (employee) set through a custom field added with Customize Form. One order (Osstem, October) was only partly received, so it remains open.

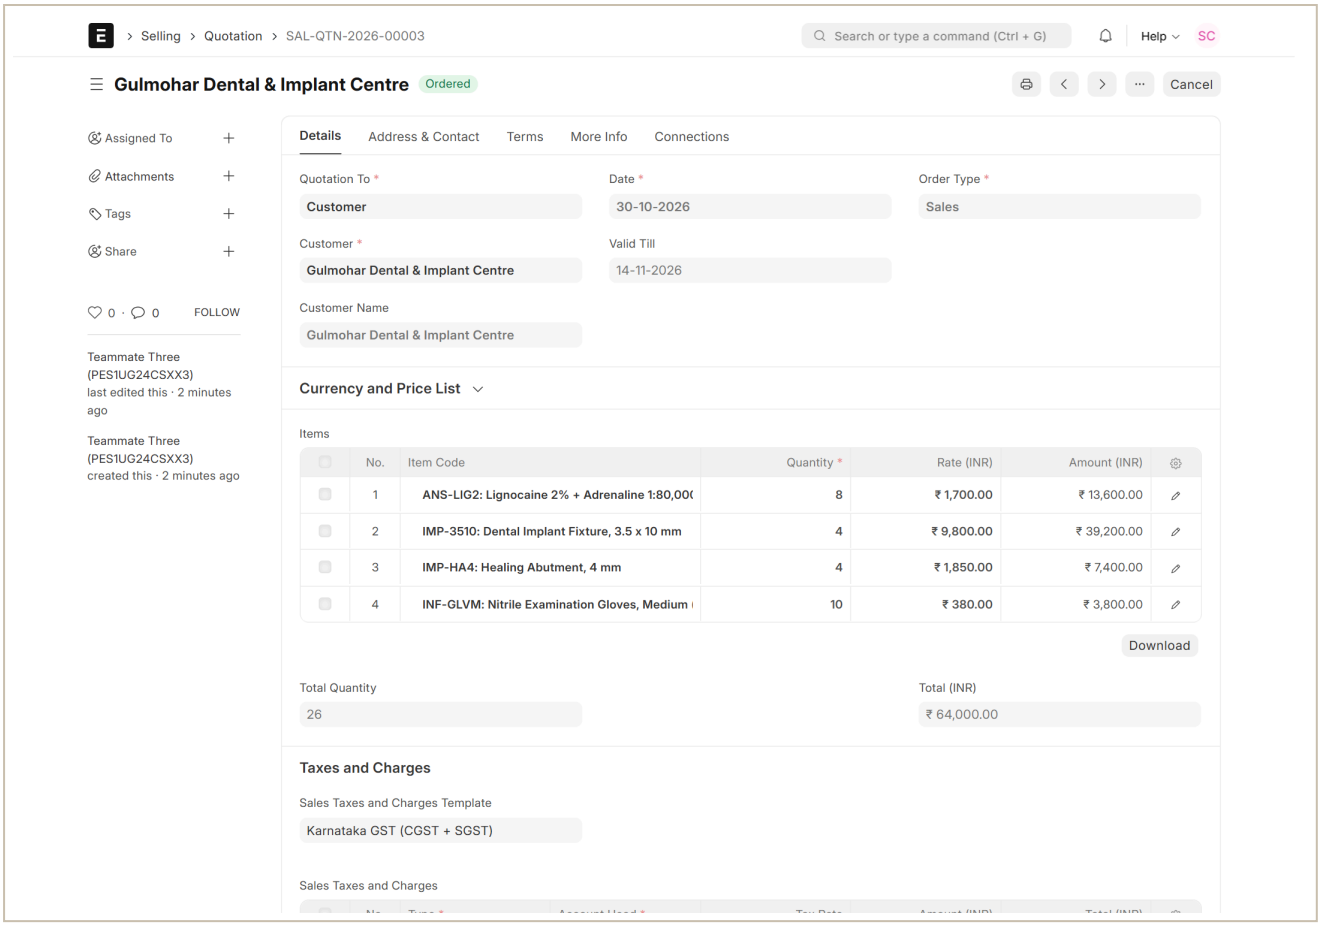

Figure 16. Cycle 1, stage 1: Quotation SAL-QTN-2026-00003

Teammate Three (PES1UG24CSXX3), who covers Bengaluru North, quotes Gulmohar Dental & Implant Centre at the Chain Tier price list with Karnataka GST (CGST + SGST) applied per item.

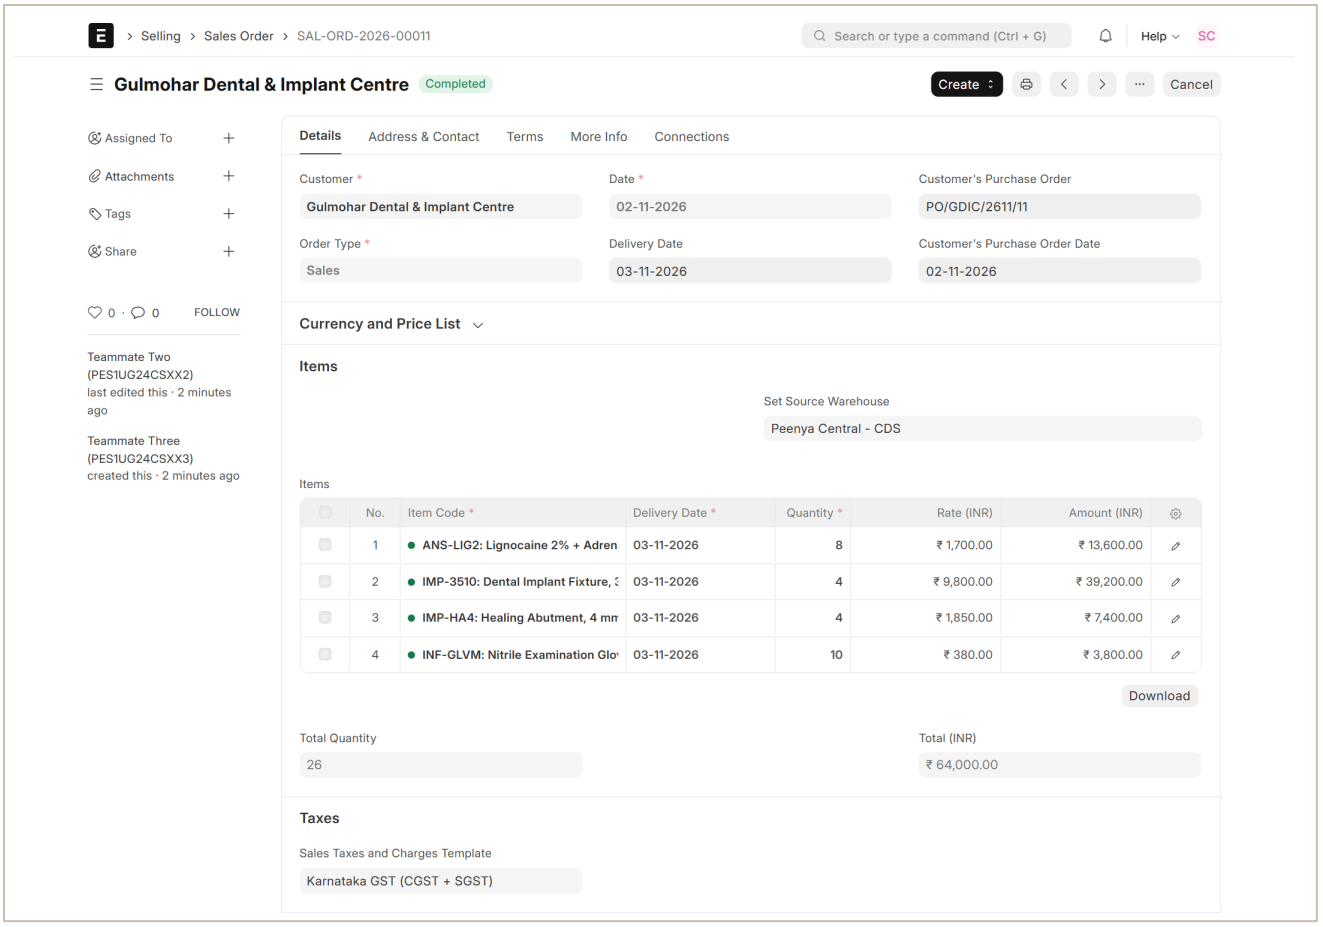

Figure 17. Cycle 1, stage 2: Sales Order SAL-ORD-2026-00011

The quotation is converted to a sales order (customer PO ref PO/GDIC/2611/11). ERPNext checks the customer's credit limit on submit. Grand total ₹67,200.

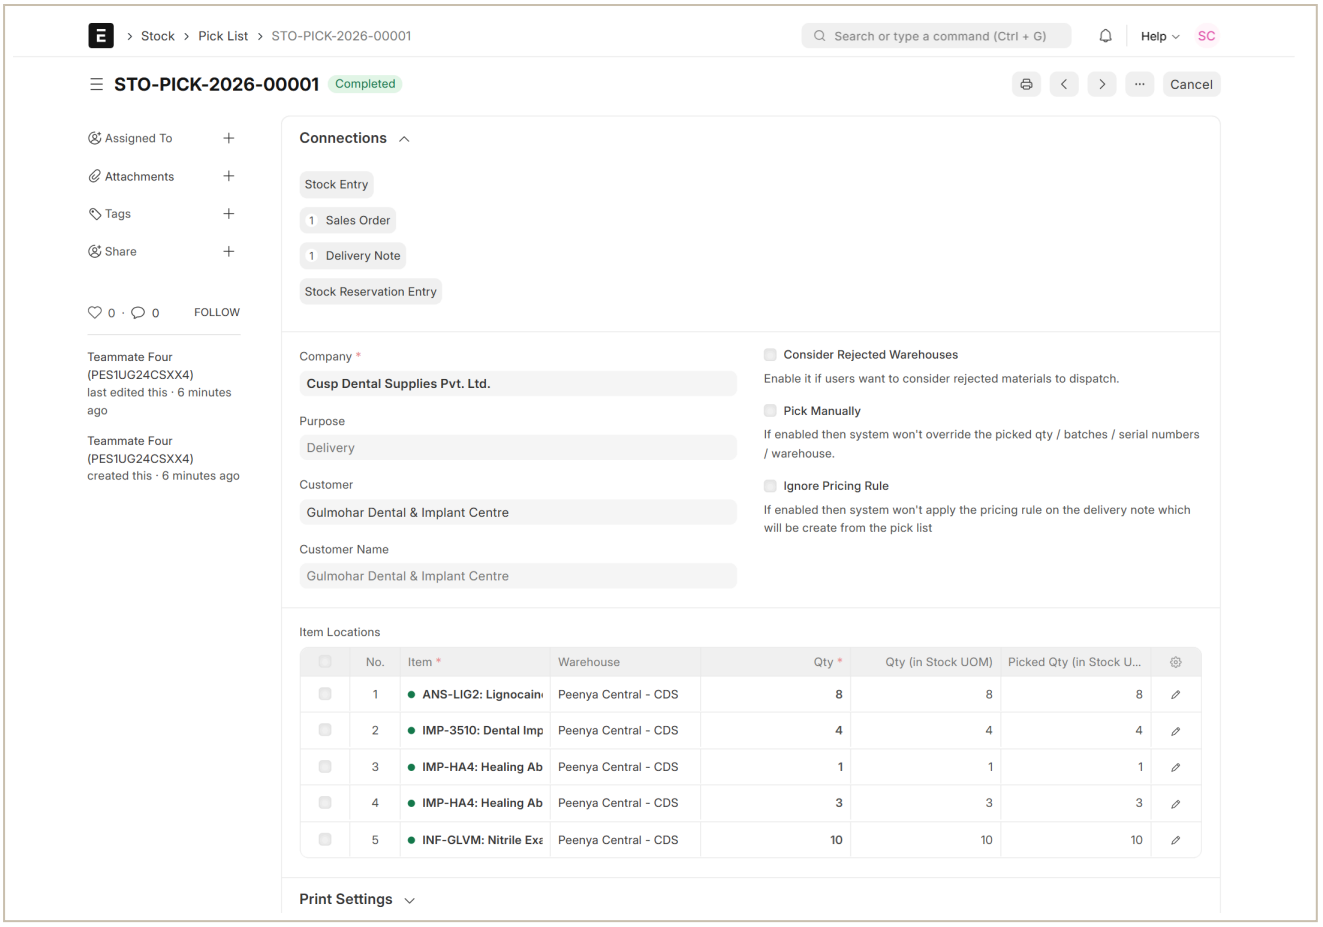

Figure 18. Cycle 1, stage 3: Pick List STO-PICK-2026-00001

Teammate Four (PES1UG24CSXX4) creates the pick list. ERPNext chooses batches by **earliest expiry first** (Stock Settings: Pick Serial / Batch Based On = Expiry). Batches picked: CDS-127-LIG2-0726B, CDS-XX3-3510-0726A, CDS-XX3-HA4-0726A, CDS-XX4-GLVM-0826, CDS-XX4-HA4-0826.

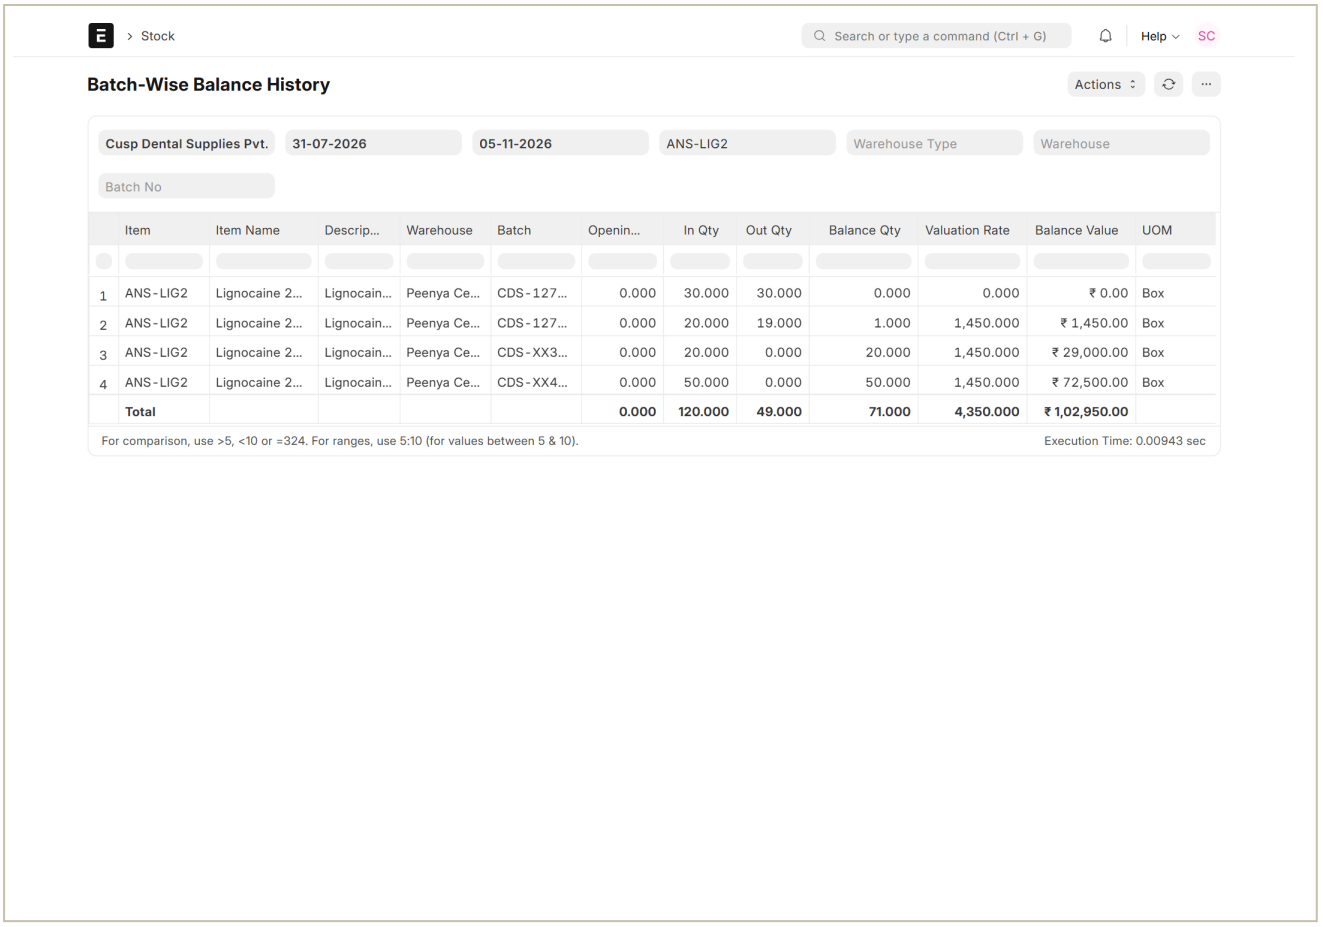

Figure 19. Cycle 1, evidence: batches consumed earliest-expiry-first

Batch-Wise Balance History for lignocaine, 31 Jul to 5 Nov 2026. The opening batch expiring January 2027 (CDS-127-LIG2-0726A) was used up first, then the June 2028 batch. The September 2028 batch received in October is untouched, and the new batch from cycle 2 (June 2029) sits on top. FEFO picking, done by ERPNext.

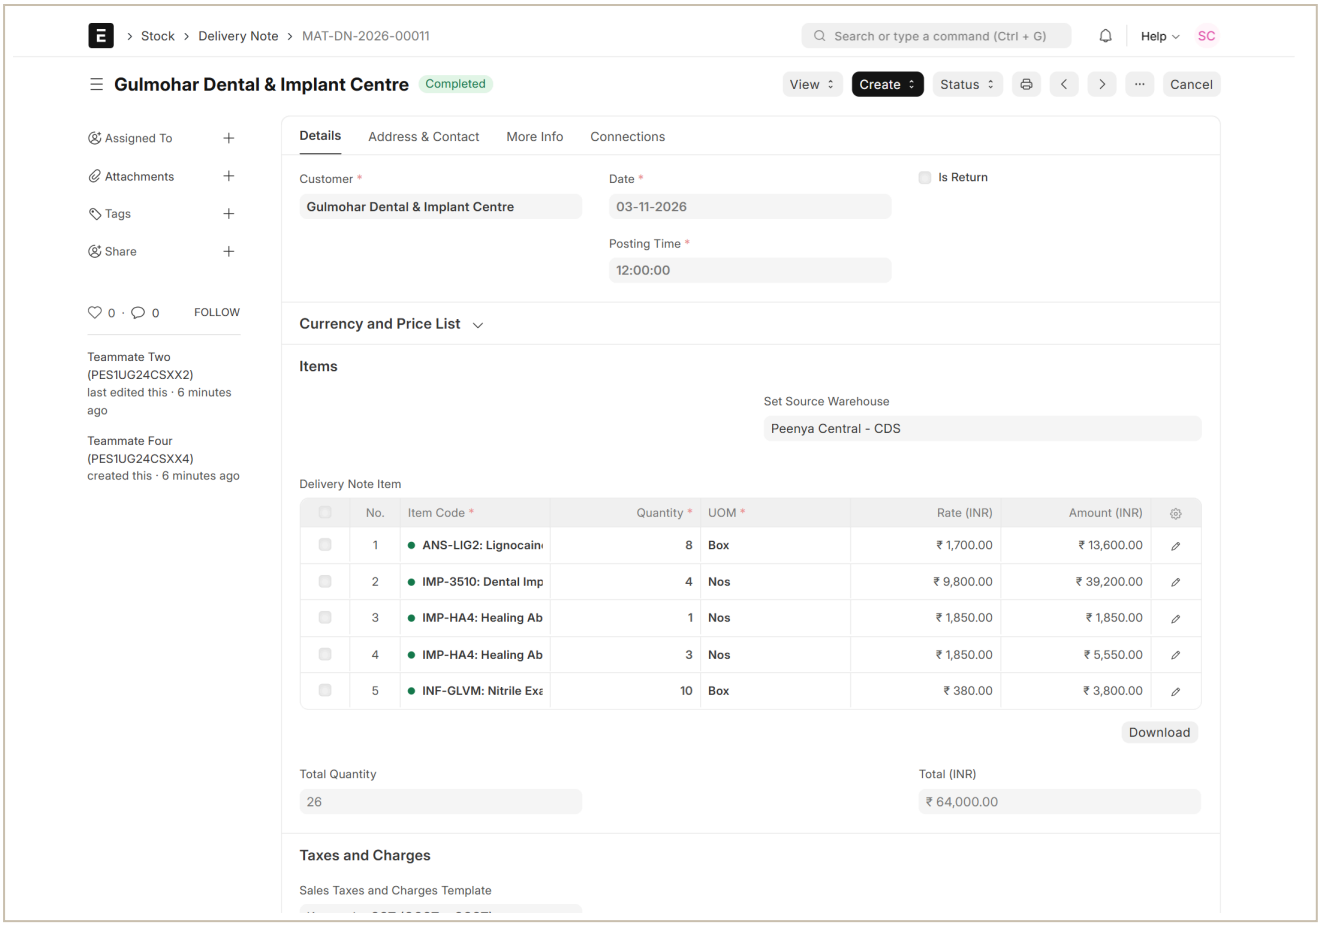

Figure 20. Cycle 1, stage 4: Delivery Note MAT-DN-2026-00011

Goods leave Peenya Central with the picked batch numbers recorded, which reduces stock and posts the cost of goods sold. The company van and driver are recorded as the transporter.

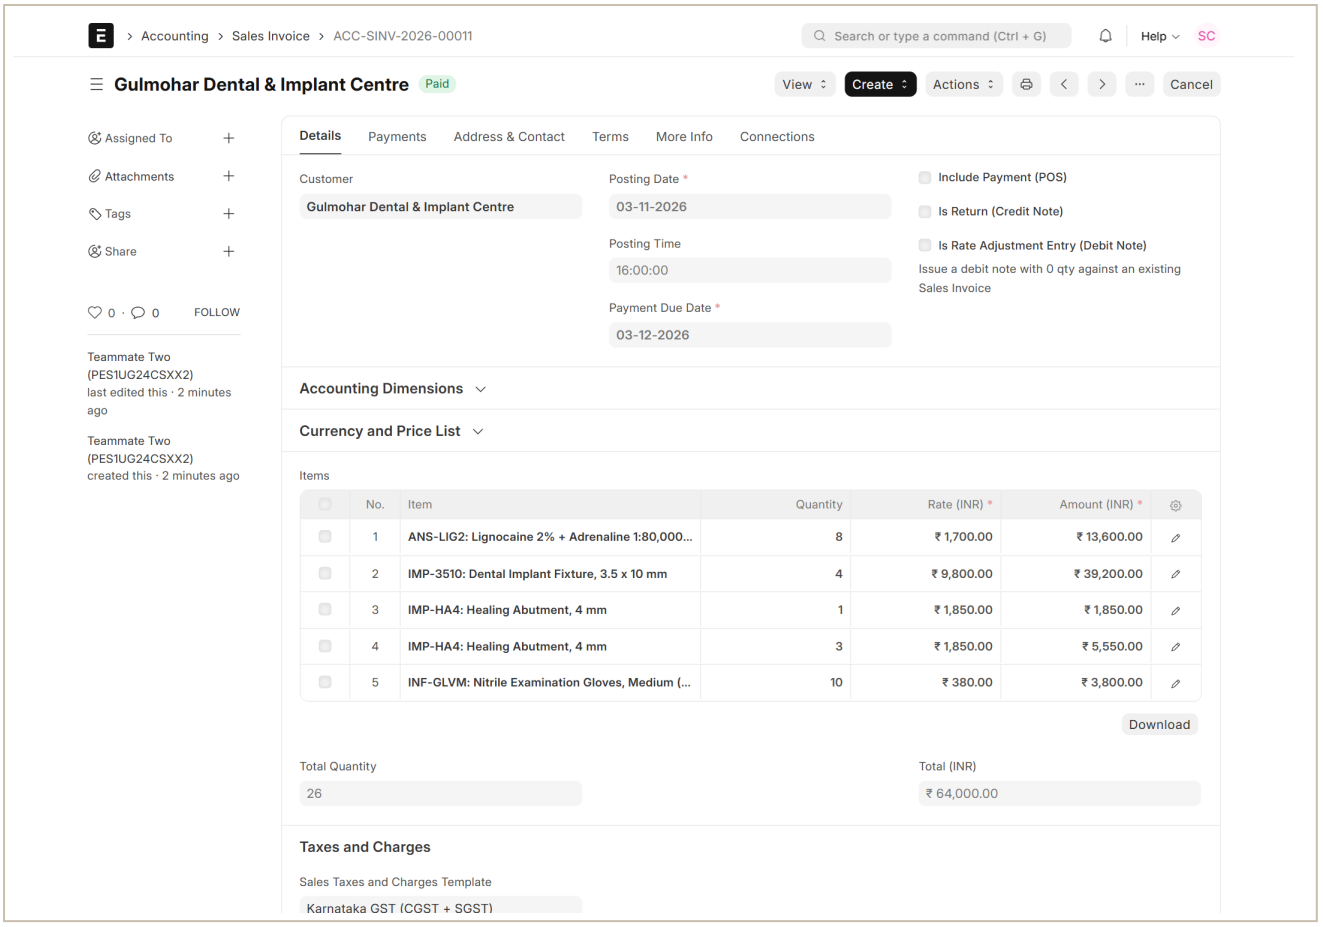

Figure 21. Cycle 1, stage 5: Sales Invoice ACC-SINV-2026-00011

Teammate Two (PES1UG24CSXX2) raises the GST invoice from the delivery note. Due date follows Net 30 terms. Invoice total ₹67,200.

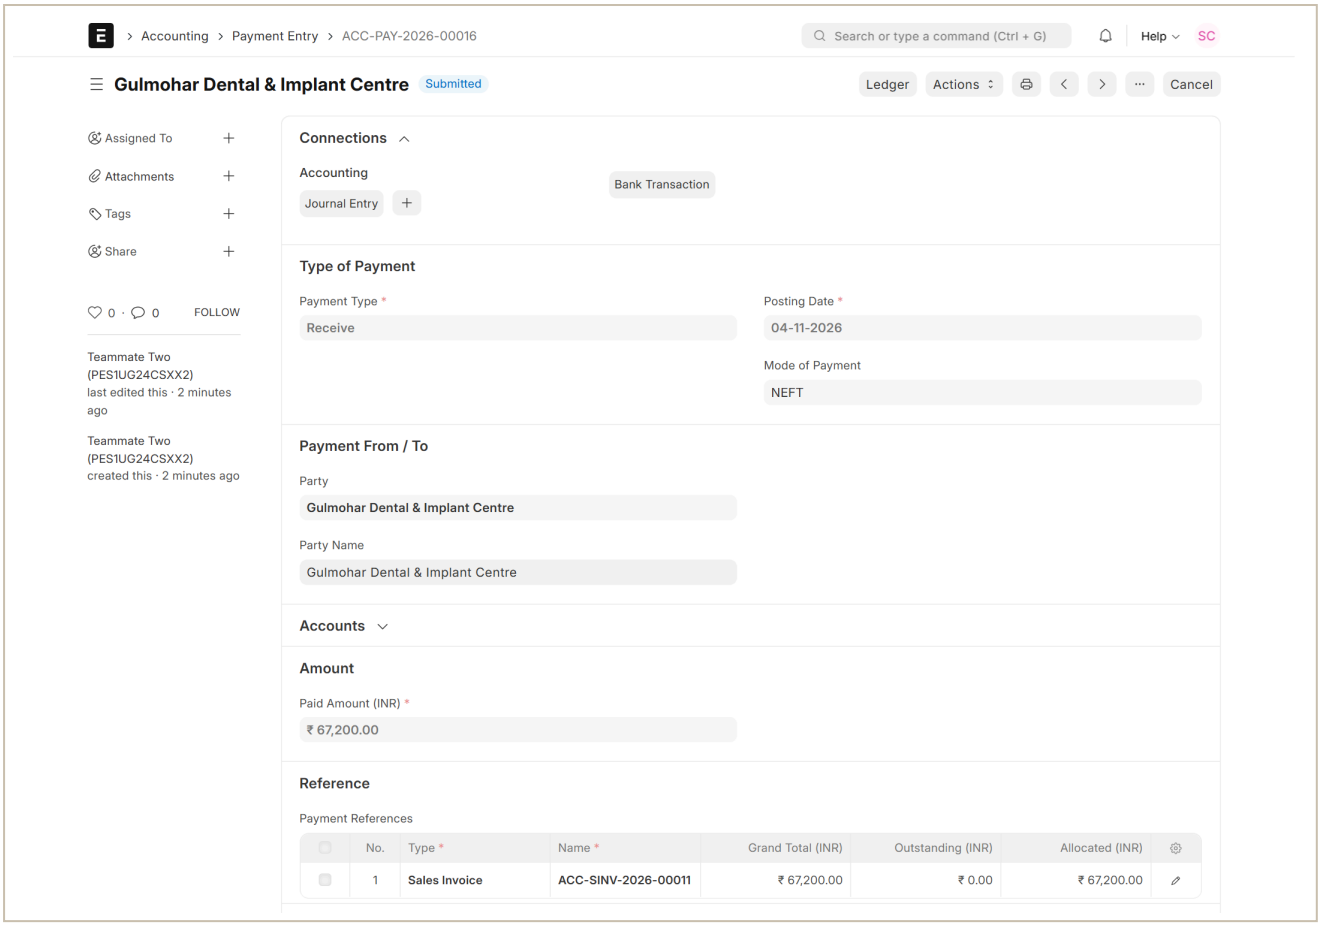

Figure 22. Cycle 1, stage 6: Payment Entry ACC-PAY-2026-00016

The clinic pays by NEFT into the Canara Bank current account. The payment is allocated against the invoice, whose status becomes Paid, closing the order-to-cash cycle.

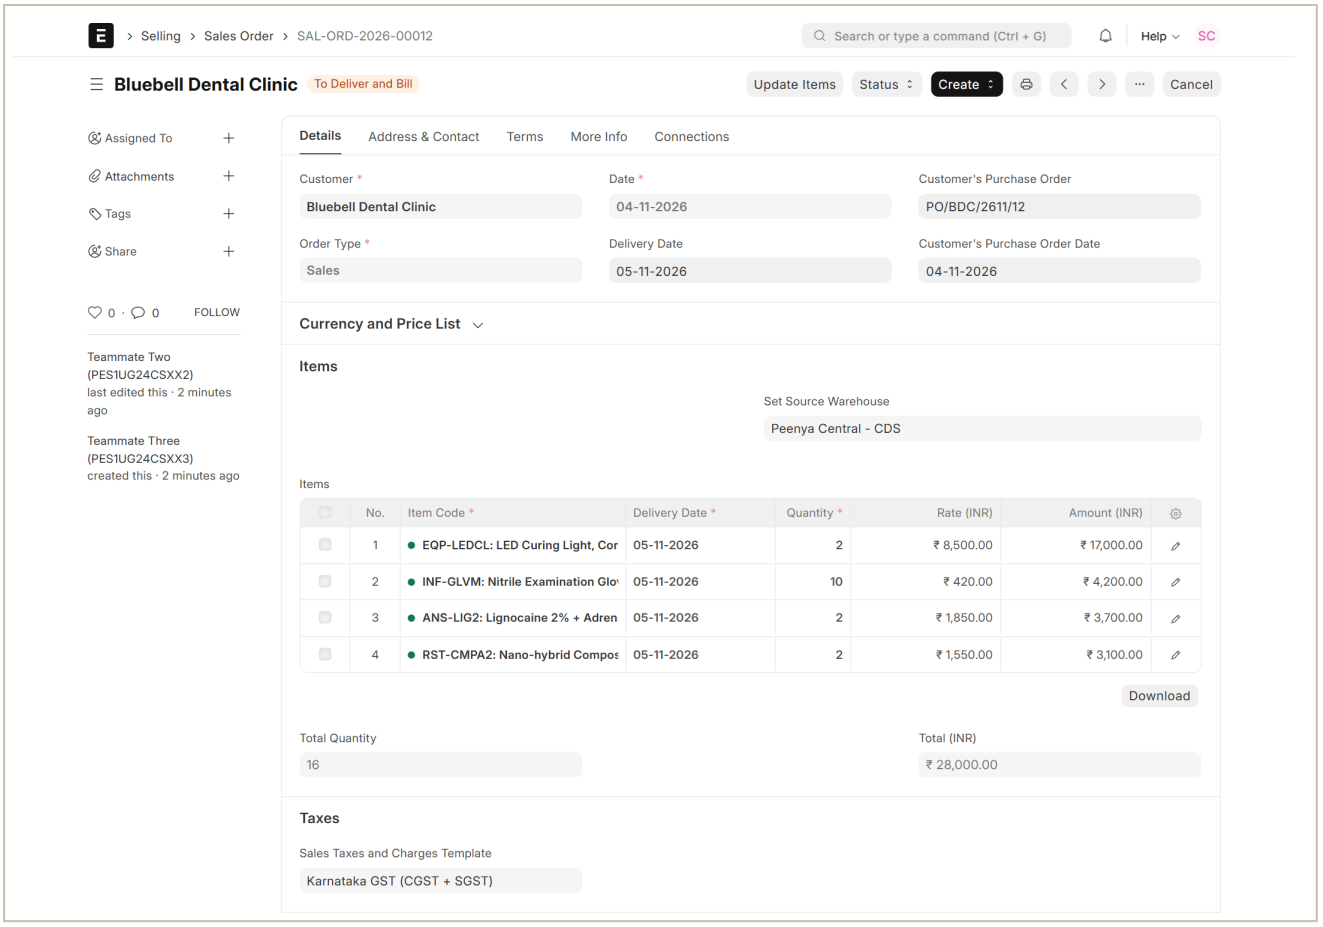

Figure 23. Cycle 1, control: credit limit on Sales Order SAL-ORD-2026-00012

Bluebell Dental Clinic has a ₹25,000 credit limit. When Teammate Three (PES1UG24CSXX3) submitted this order, ERPNext blocked it for crossing the limit. Teammate Two (PES1UG24CSXX2) (Accounts Manager, the configured Credit Controller) approved and submitted it.

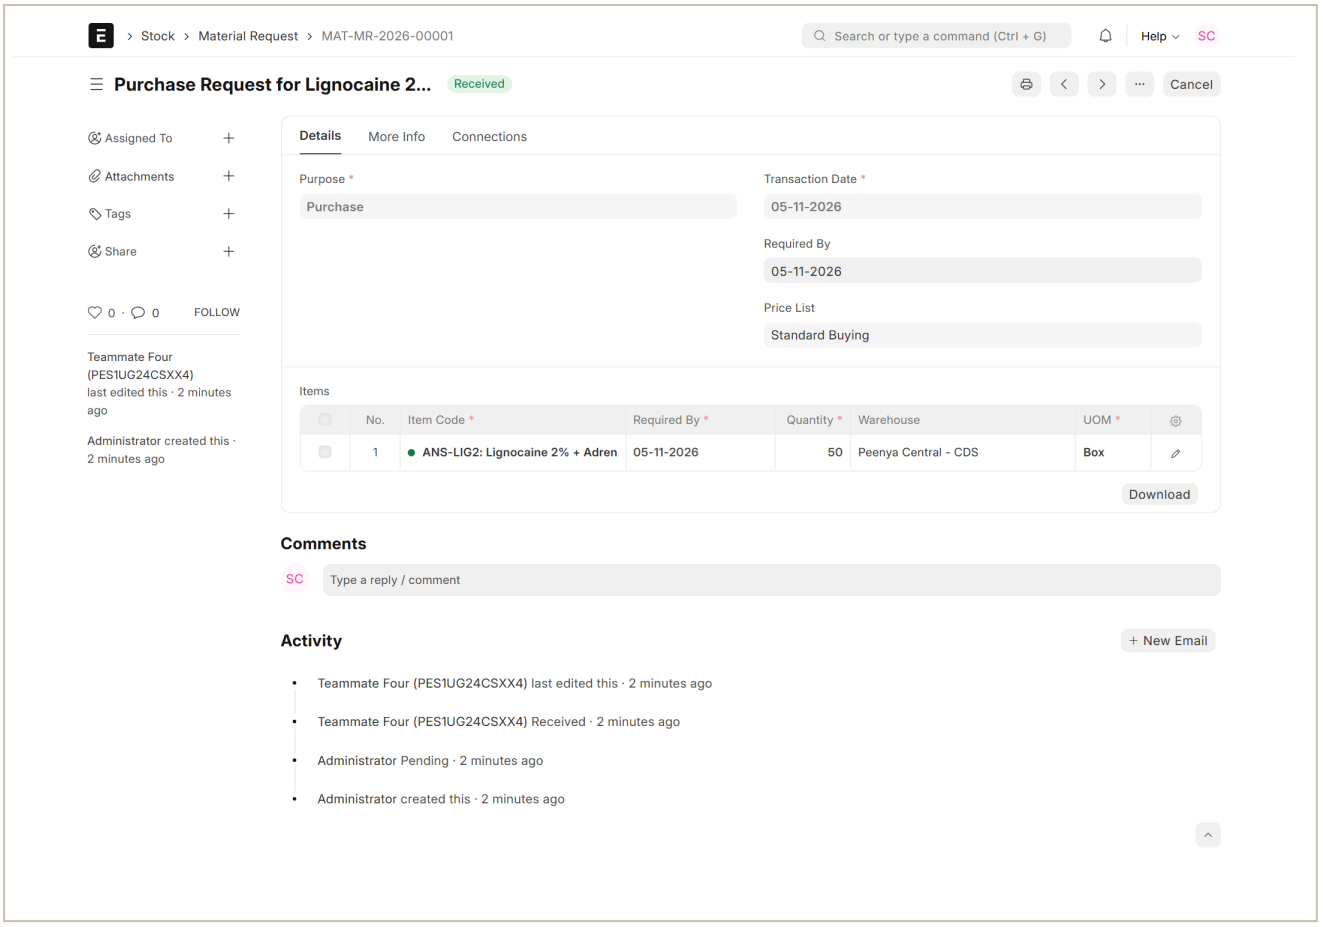

Figure 24. Cycle 2, stage 1: Material Request MAT-MR-2026-00001 (raised automatically)

Lignocaine stock fell below its reorder level of 25 boxes. ERPNext's reorder job (Stock Settings: raise Material Request when stock reaches re-order level) created this purchase request for the reorder quantity of 50 boxes. No one typed it.

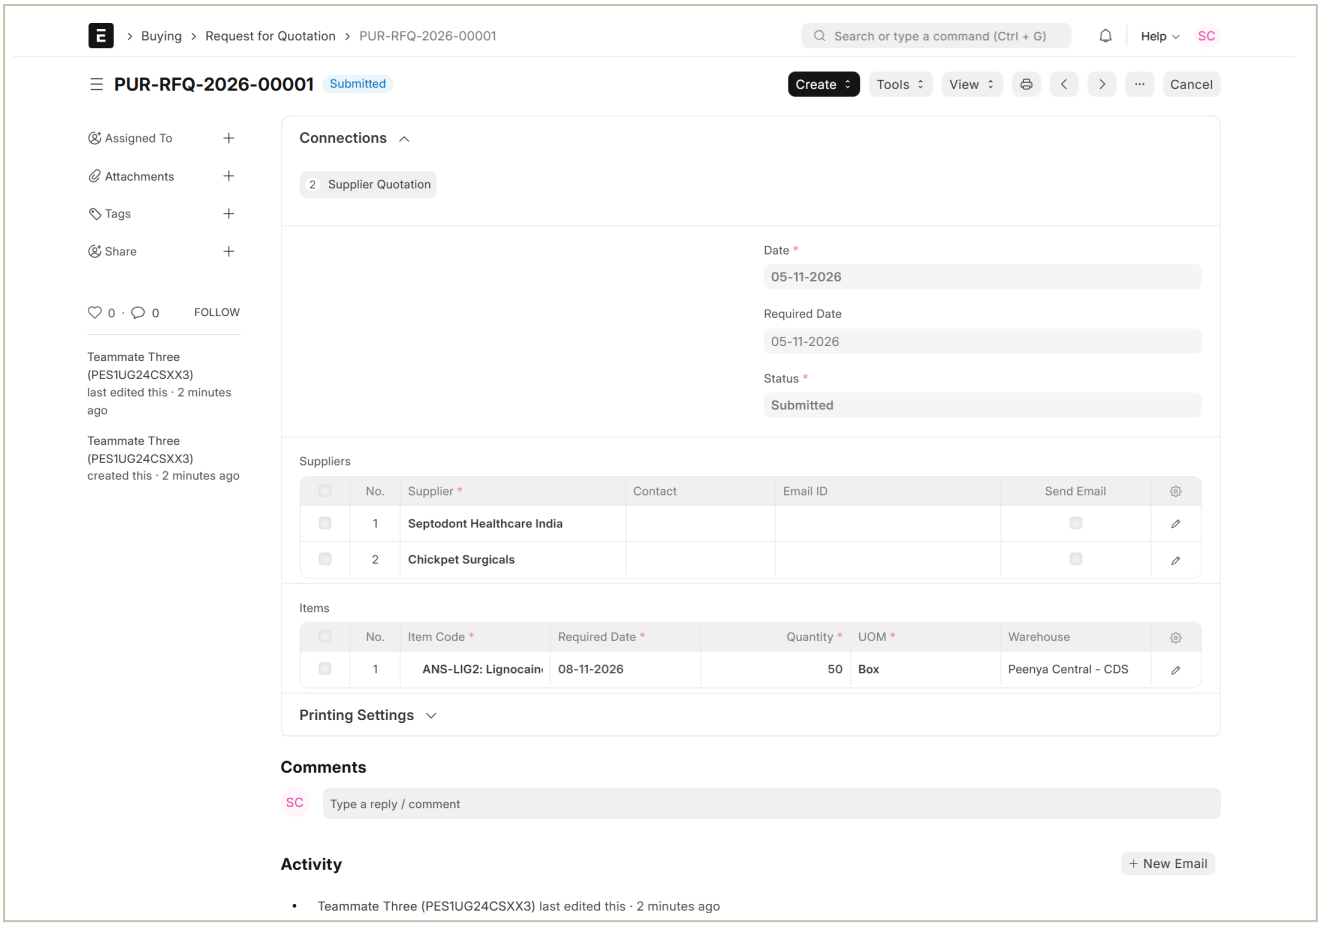

Figure 25. Cycle 2, stage 2: Request for Quotation PUR-RFQ-2026-00001

Teammate Three (PES1UG24CSXX3) sends the requirement to two suppliers, Septodont and Chickpet Surgicals, asking for a minimum 24 months of shelf life.

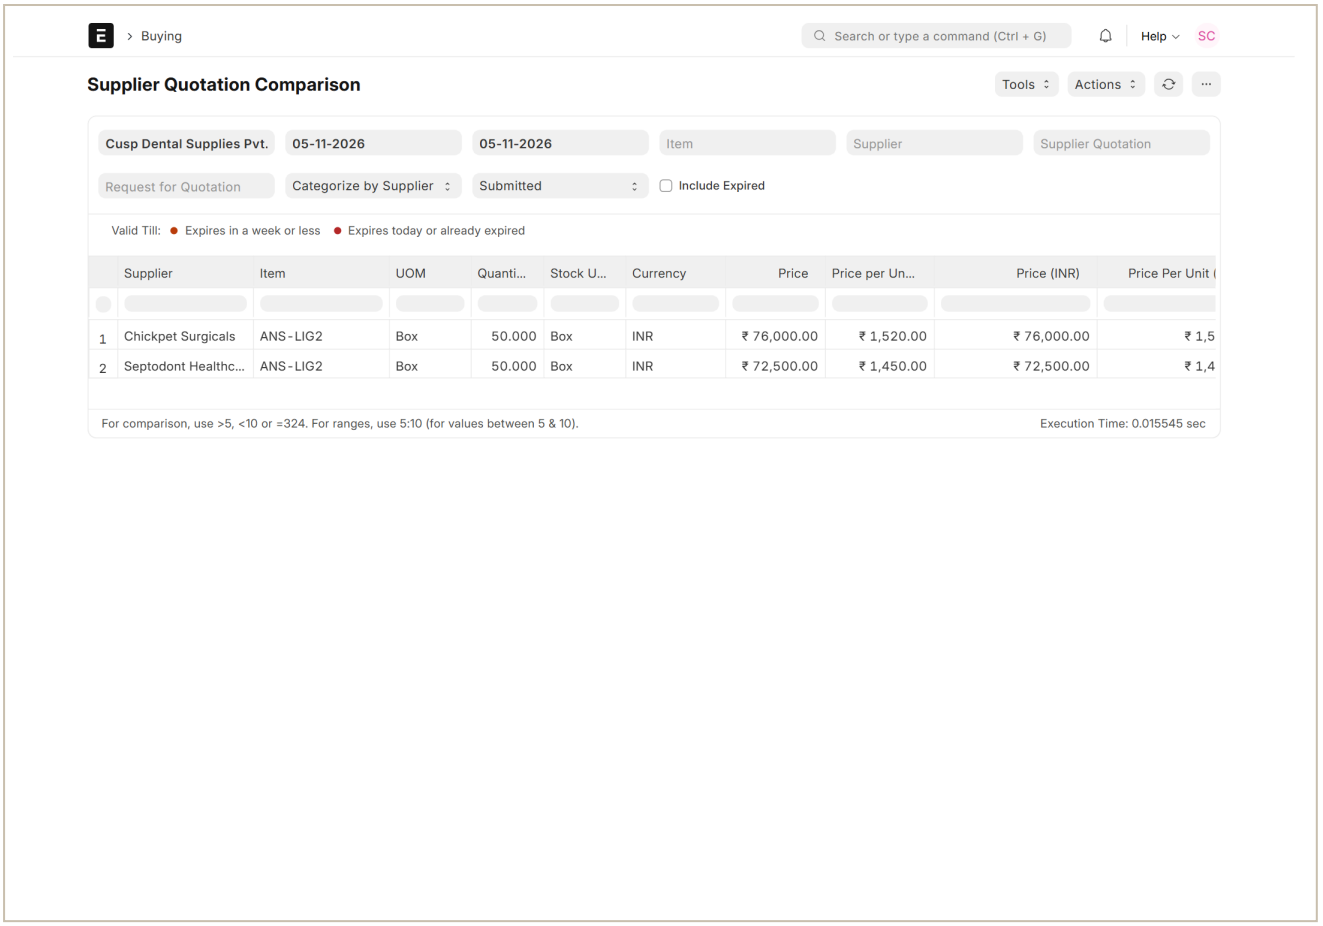

Figure 26. Cycle 2, stage 3: Supplier Quotation Comparison

Both suppliers' quotations side by side. Septodont quoted ₹1,450 per box against Chickpet's ₹1,520, so Septodont wins the order.

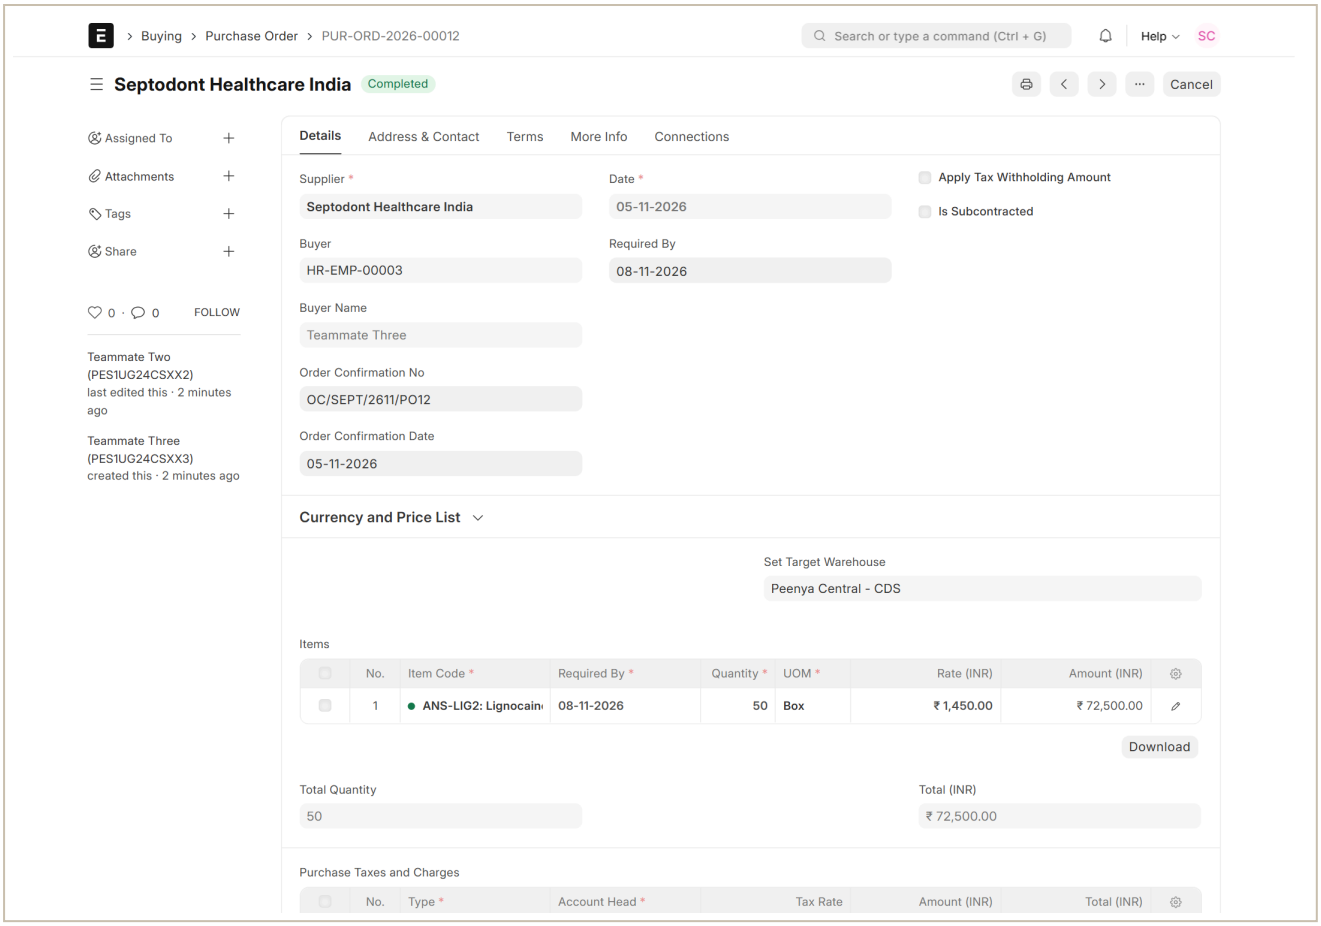

Figure 27. Cycle 2, stage 4: Purchase Order PUR-ORD-2026-00012

Created from the winning supplier quotation, with Teammate Three (PES1UG24CSXX3) as Buyer. Grand total ₹76,125 including input GST.

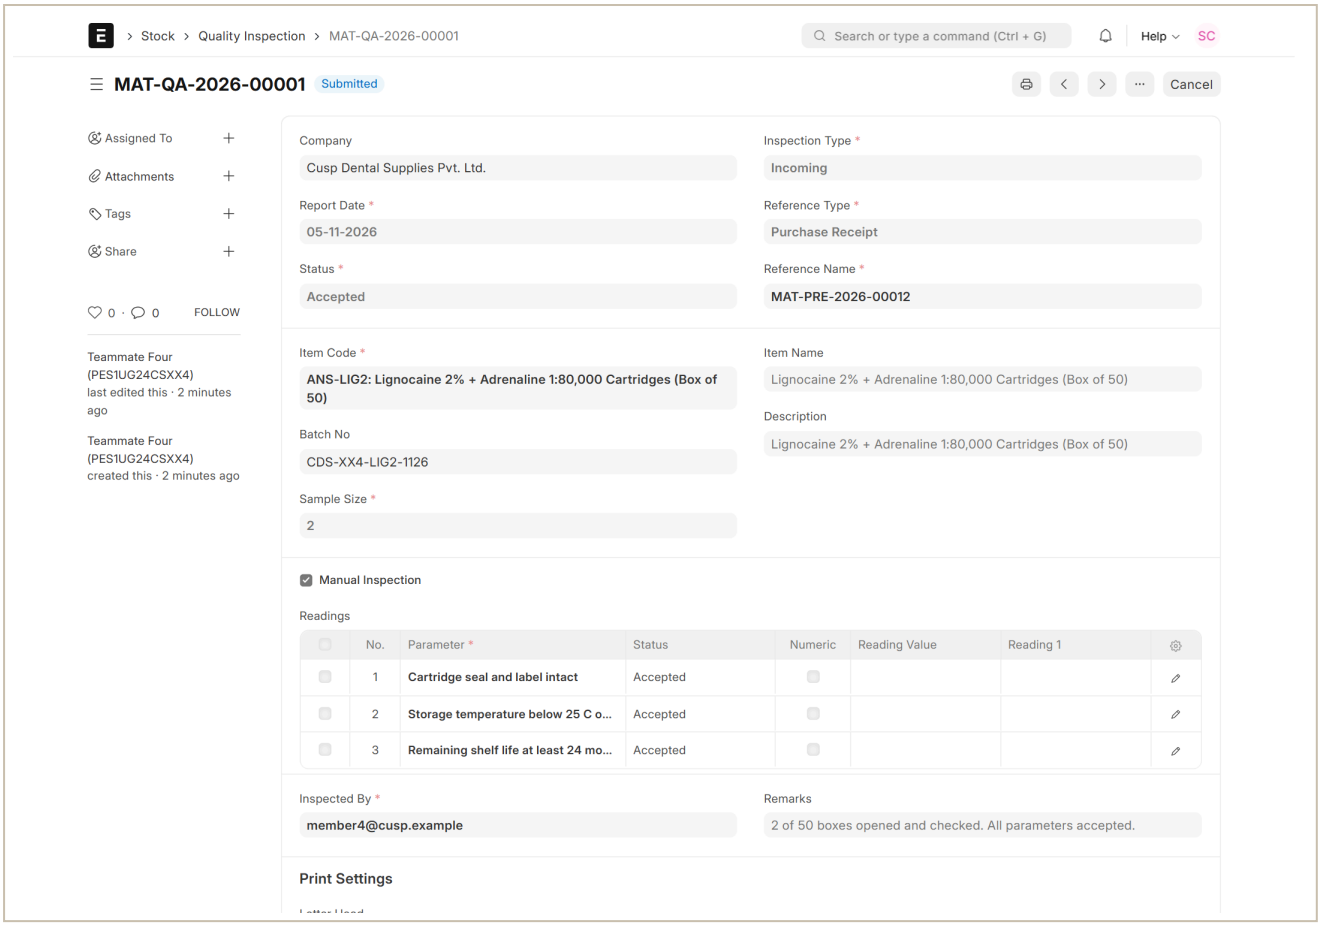

Figure 28. Cycle 2, stage 5a: Quality Inspection MAT-QA-2026-00001

Teammate Four (PES1UG24CSXX4) inspects a sample of 2 boxes against three parameters (seal and label, storage temperature, remaining shelf life). Status Accepted. The receipt cannot be submitted without it.

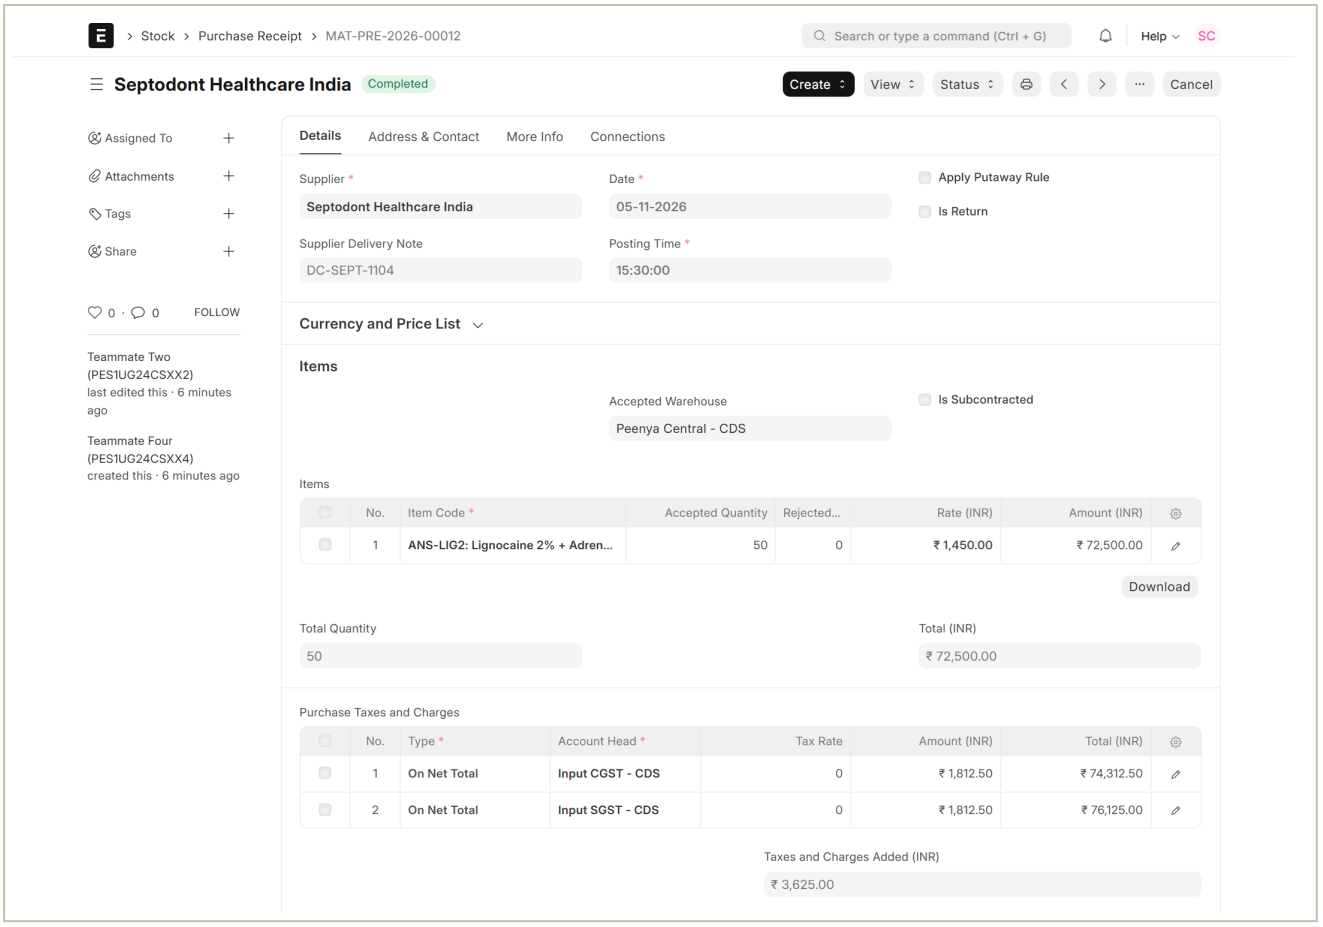

Figure 29. Cycle 2, stage 5b: Purchase Receipt MAT-PRE-2026-00012

The 50 boxes arrive with a new batch whose ID carries the receiver's SRN and an expiry of June 2029. Stock increases at Peenya Central.

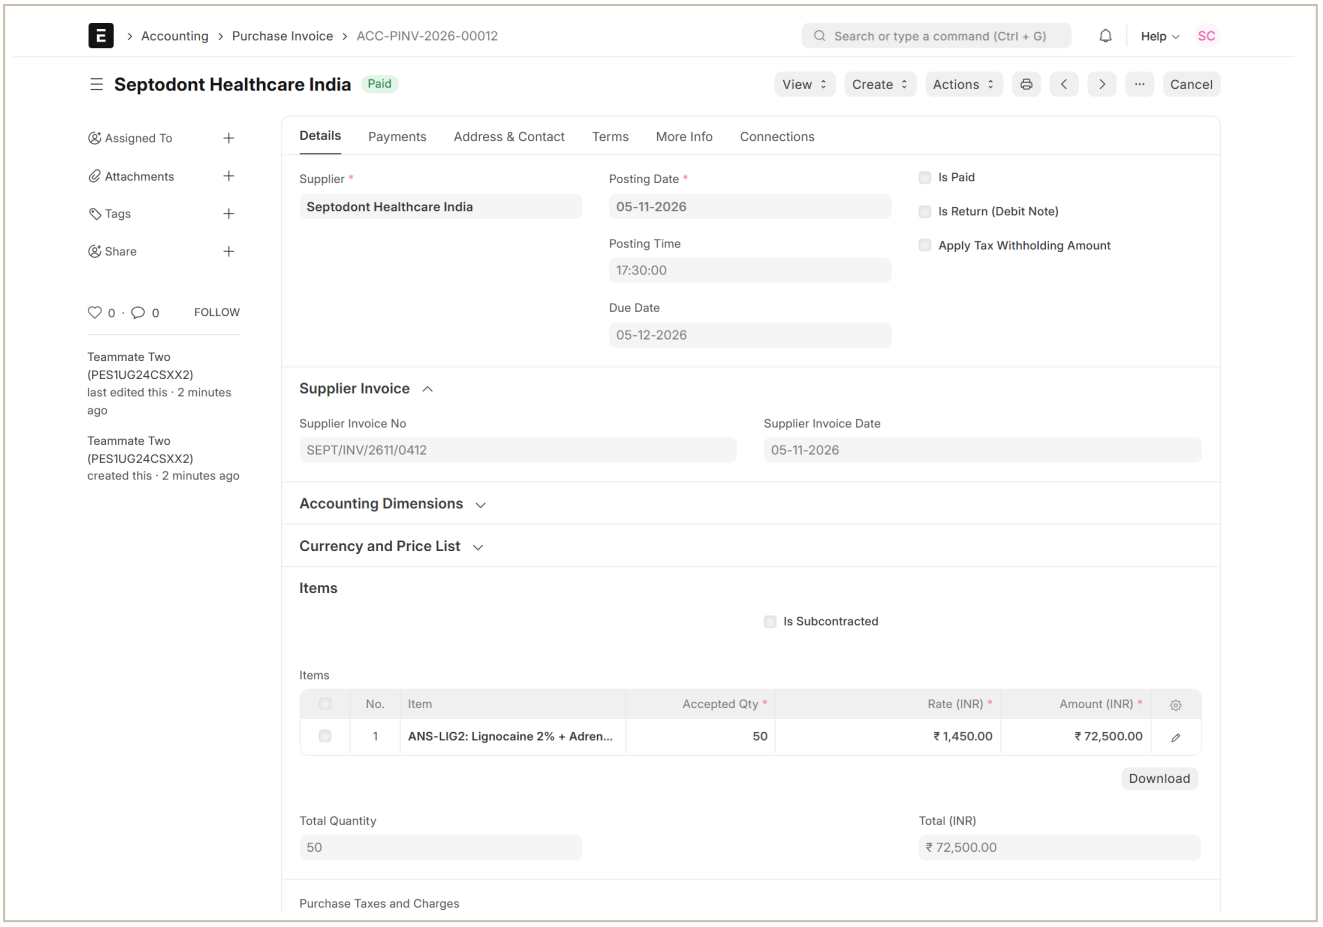

Figure 30. Cycle 2, stage 6: Purchase Invoice ACC-PINV-2026-00012

Created from the purchase receipt, so it is linked to both the receipt and the purchase order. Buying Settings require a PO and a receipt before any purchase invoice.

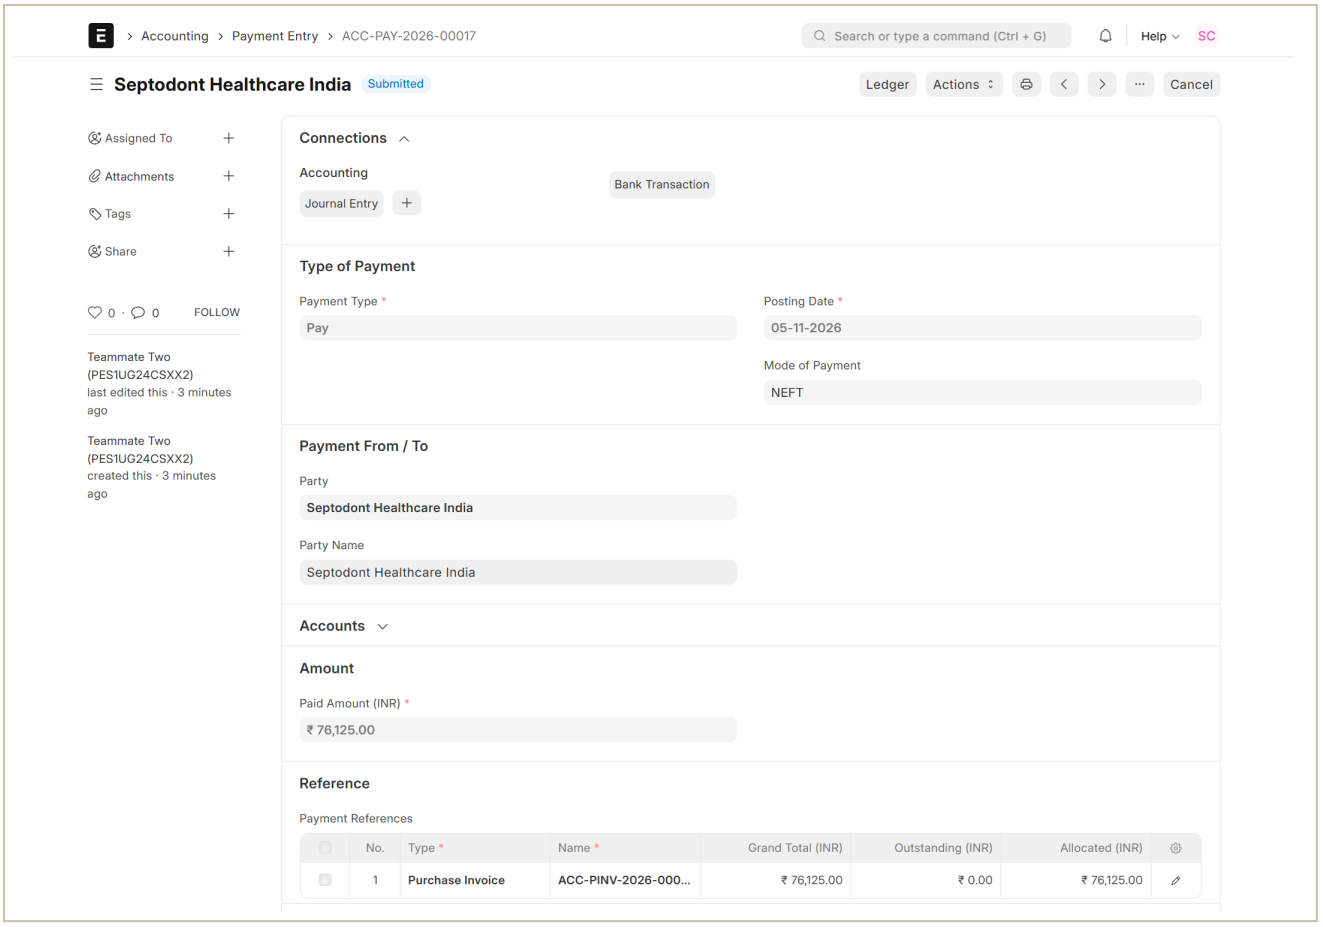

Figure 31. Cycle 2, stage 7: Payment Entry ACC-PAY-2026-00017

Teammate Two (PES1UG24CSXX2) pays Septodont by NEFT, which closes the procure-to-pay cycle.

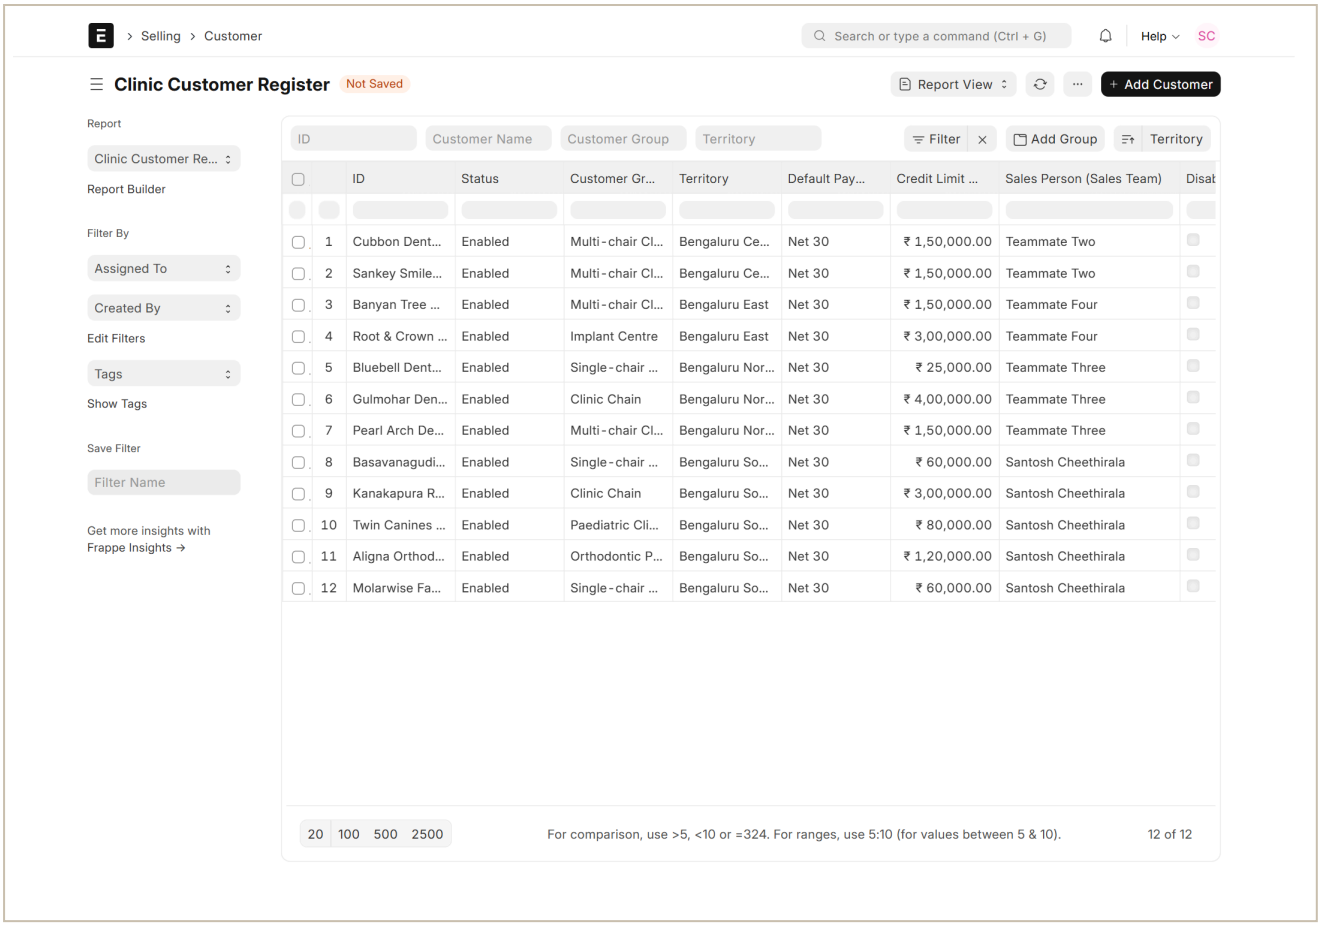

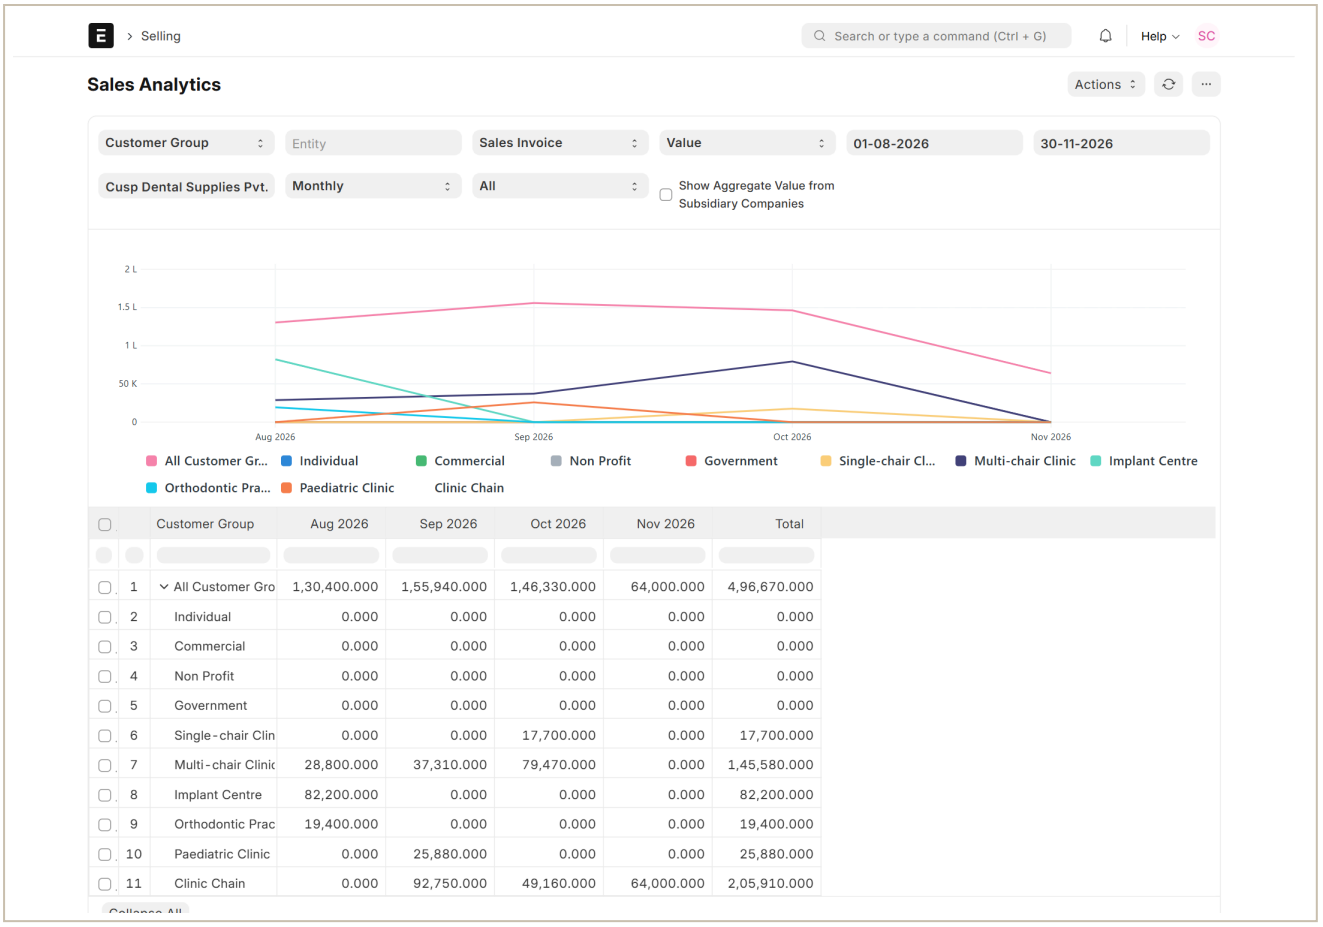

Figure 32. Report 1 (master data): Clinic Customer Register

A Report Builder report on the Customer master showing group, territory, payment terms, credit limit and sales person for every clinic. Built entirely in the UI.

	Customer Group	Aug 2026	Sep 2026	Oct 2026	Nov 2026	Total

Figure 36. Report 5: Purchase Analytics by supplier, monthly

Purchase value per supplier per month. Total purchases August to November: ₹6,96,854.

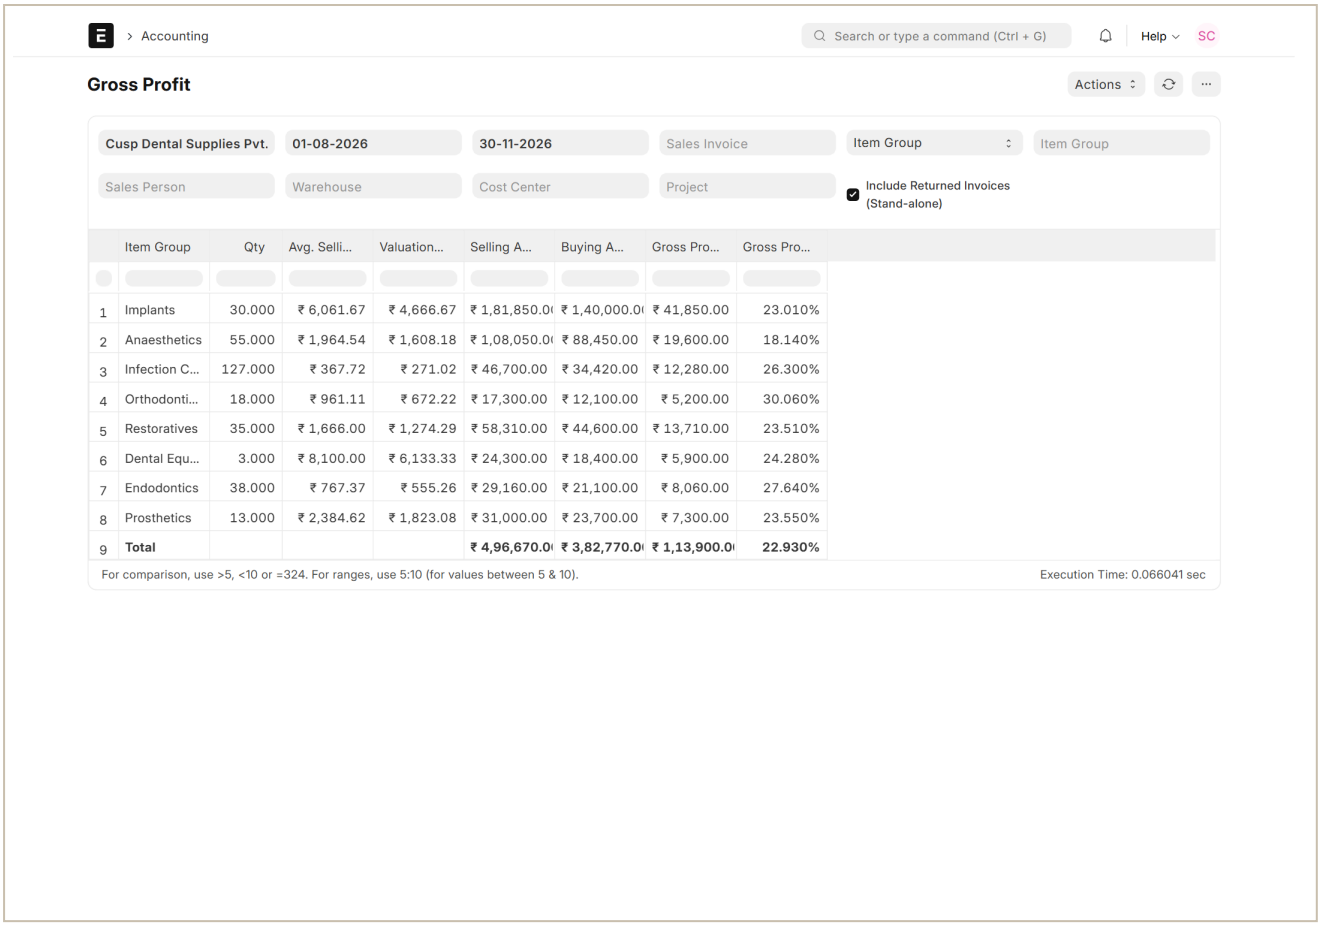

Figure 37. Report 6: Gross Profit by item group

Selling amount, buying amount and gross profit per item group. Overall gross profit ₹1,13,900, a margin of 22.9%.

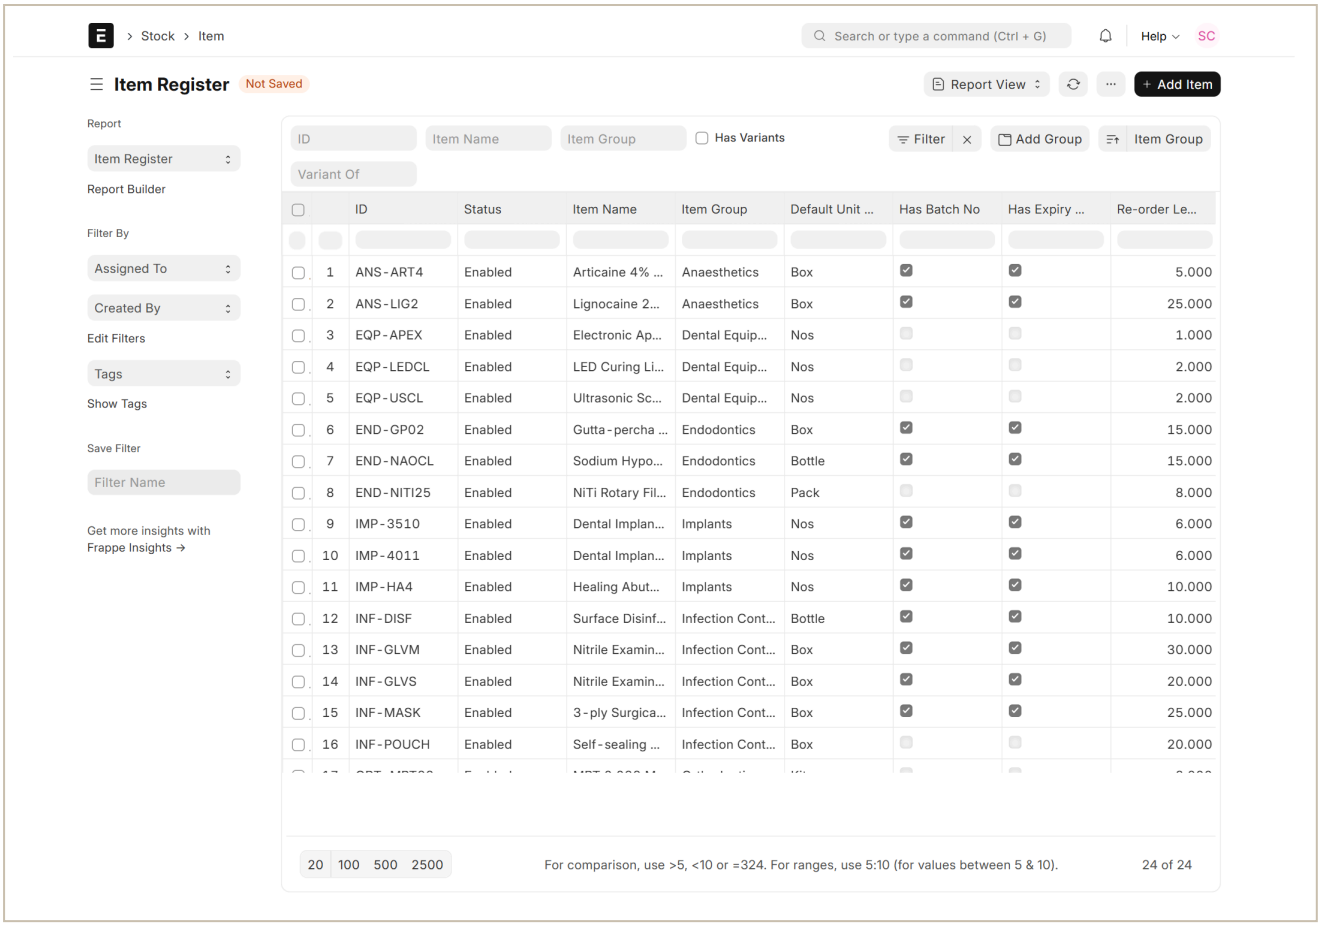

Figure 38. Report 7 (master data): Item Register

A Report Builder report on the Item master showing group, unit, batch and expiry tracking, and reorder level and quantity for all 24 items.

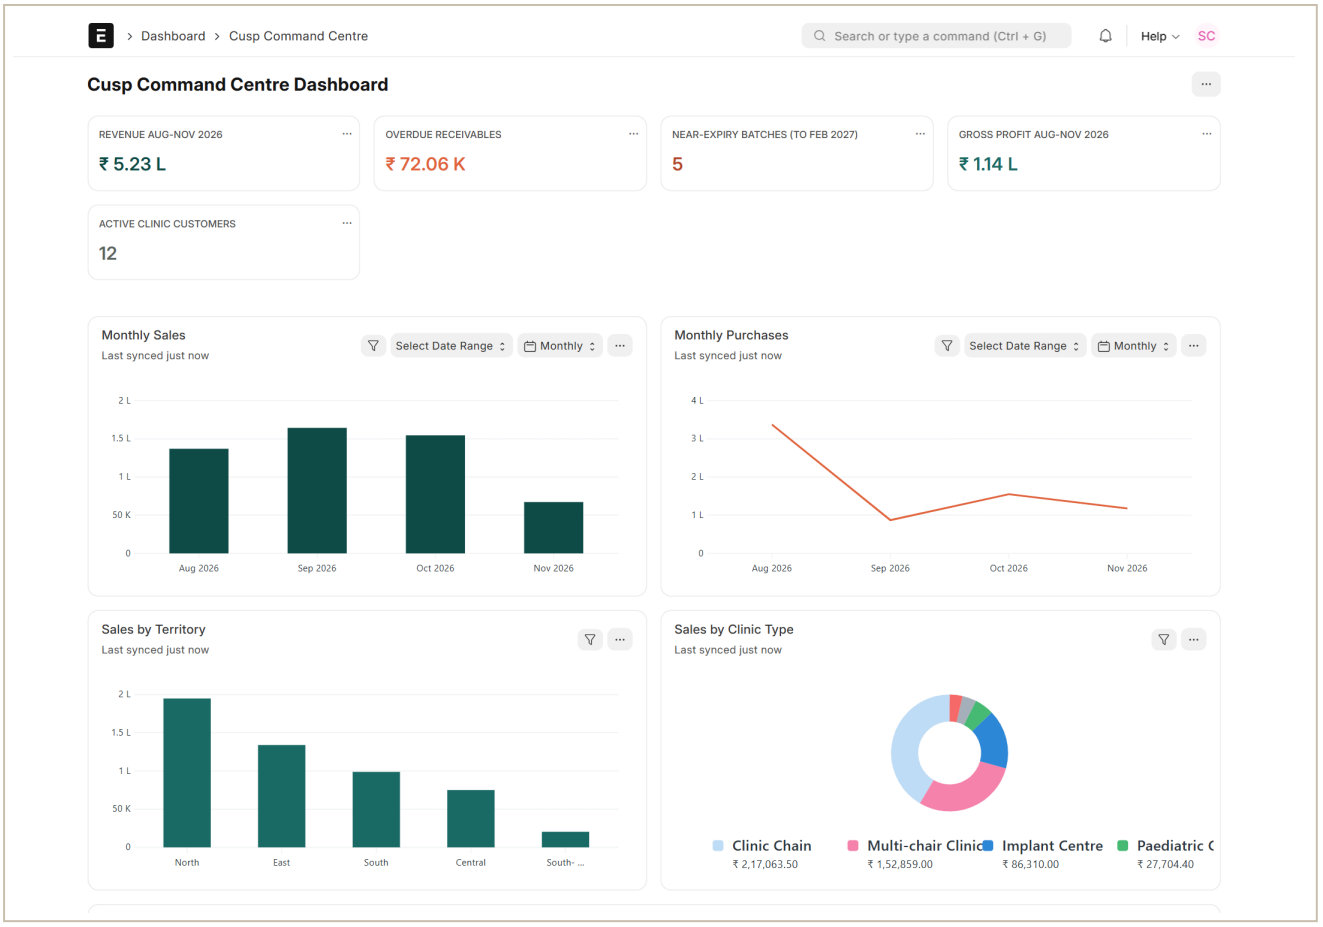

Figure 39. Executive dashboard: Cusp Command Centre (KPIs)

Five Number Cards: Revenue, invoice totals incl. GST (₹5,22,892), Overdue Receivables, Near-expiry Stock, Gross Profit and Active Clinic Customers. Below them, the Monthly Sales column chart and the Monthly Purchases line chart.

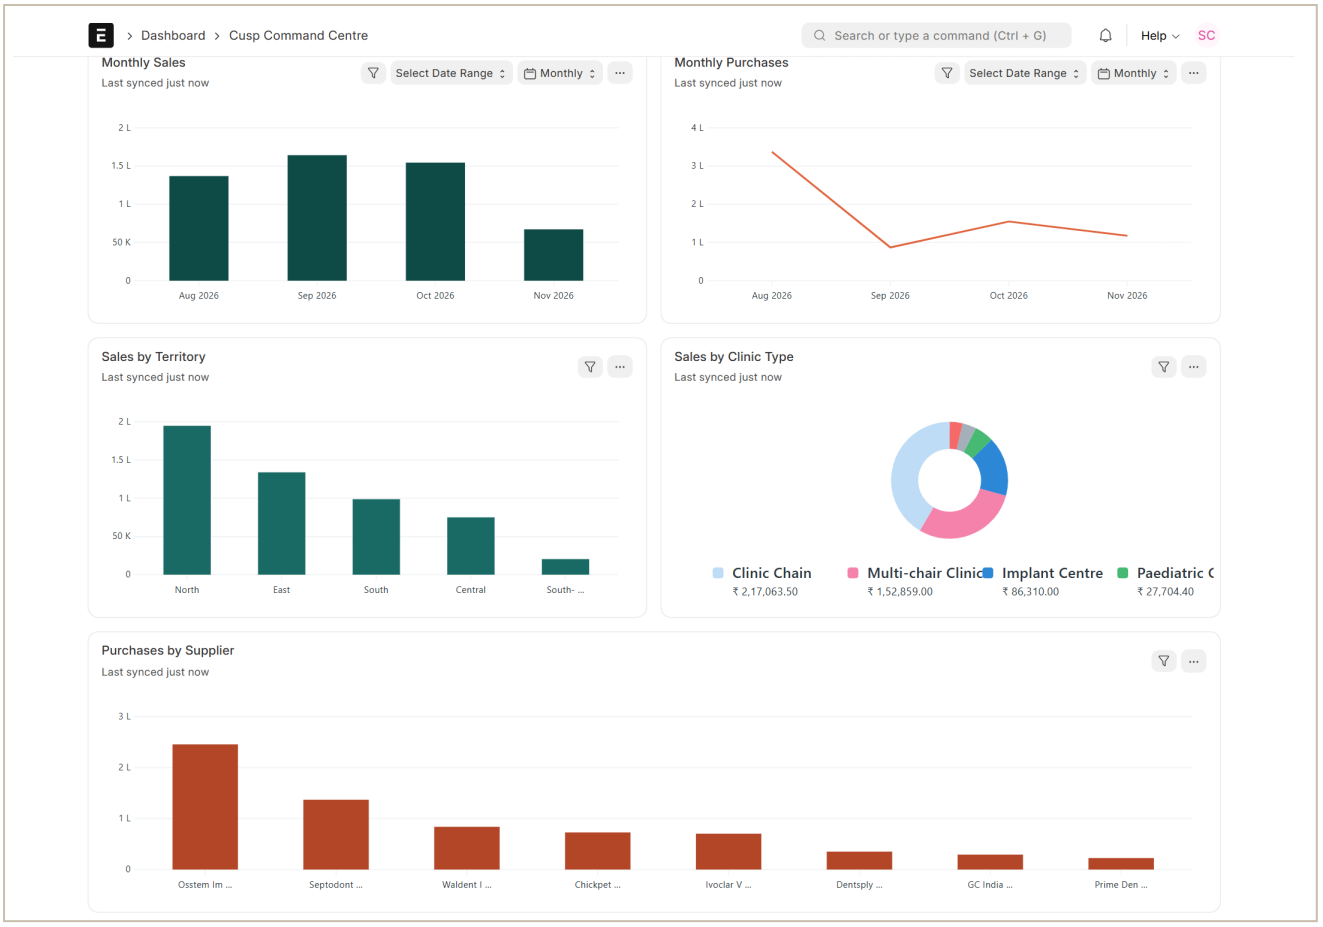

Figure 40. Executive dashboard: charts

Sales by Territory (bar), Sales by Clinic Type (donut) and Purchases by Supplier (bar). Every card and chart was configured from the Dashboard, Number Card and Dashboard Chart screens, without code.

Cusp Dental Supplies on ERPNext: Order-to-Cash tables (MariaDB; Link fields shown as FK)

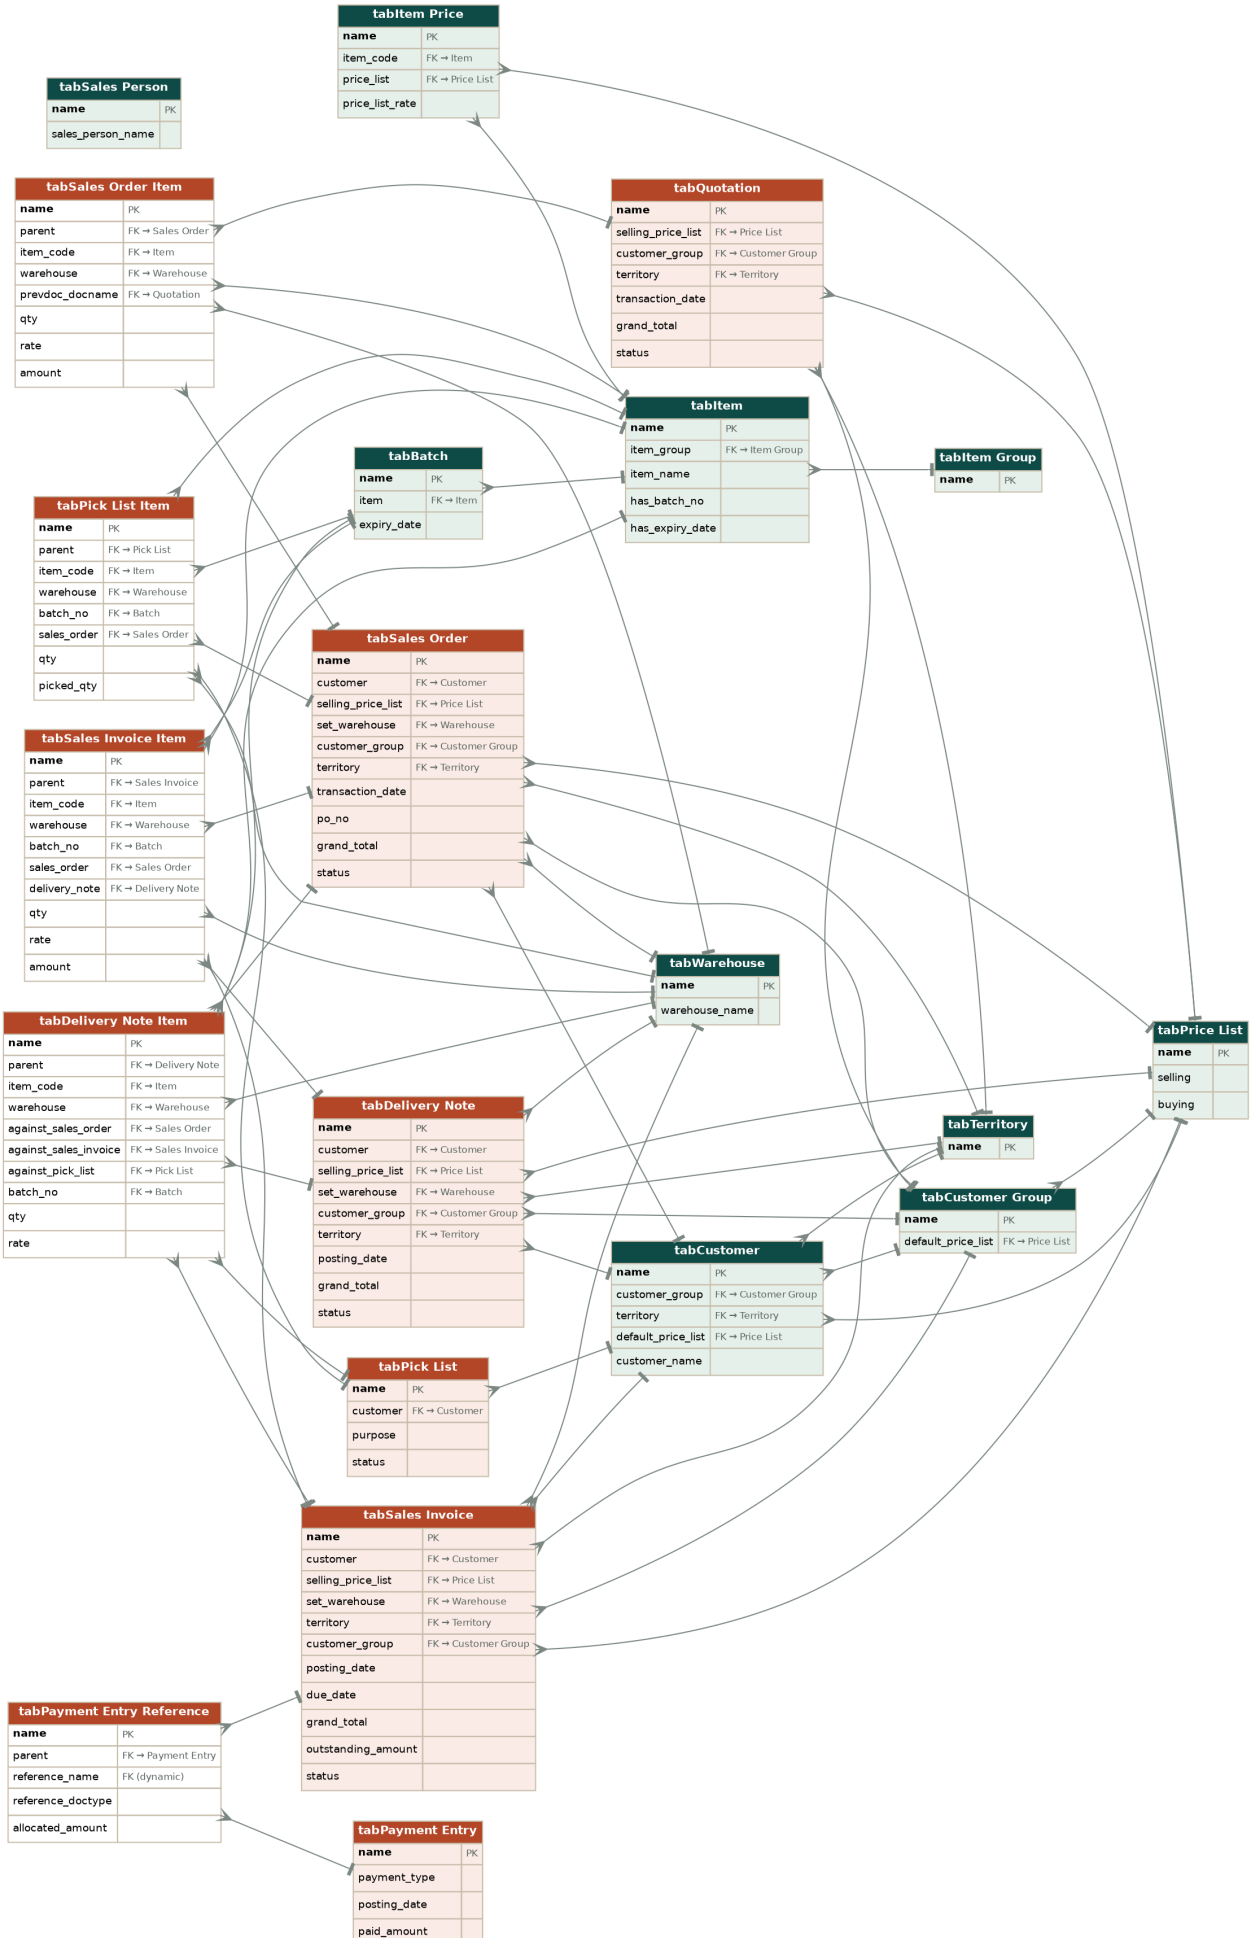

Figure 41. Relational schema 1: Order-to-Cash tables

ERPNext stores each DocType in a MariaDB table named tab<DocType>. Frappe does not create database foreign keys, so the relations shown are its Link fields, read from the live DocType metadata and drawn with Graphviz. Teal = master tables, coral = transaction tables, white = child (line-item) tables.

Cusp Dental Supplies on ERPNext: Procure-to-Pay tables (MariaDB; Link fields shown as FK)

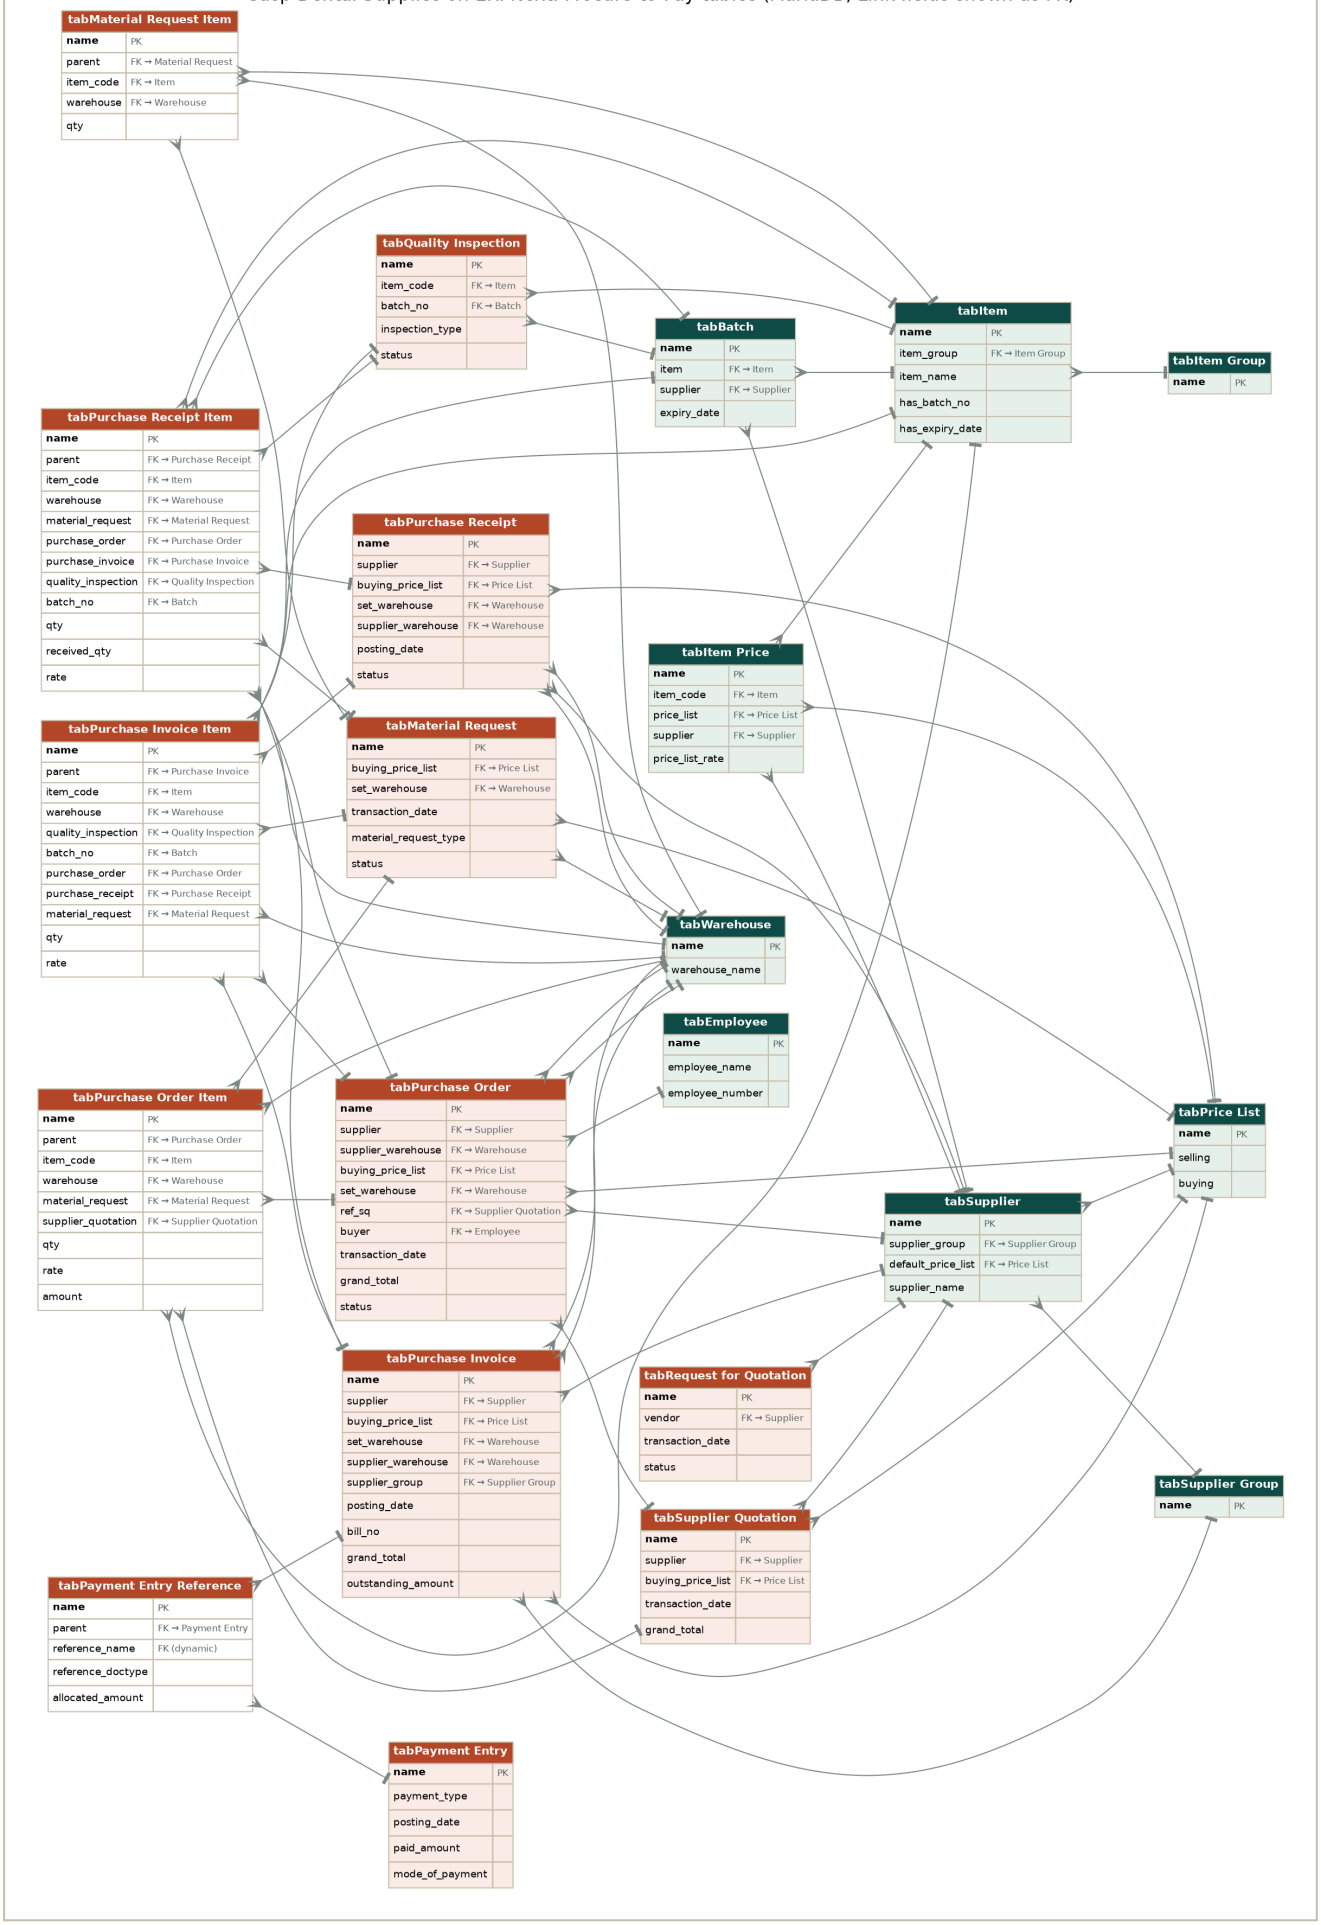

Figure 42. Relational schema 2: Procure-to-Pay tables

The buying side: material request, RFQ, supplier quotation, purchase order, receipt, quality inspection, invoice and payment, with their line-item child tables and links to the masters.
